

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		439	Barbara Jacobson	<p>There are very few safe public places you can ride today. Our roads are now too dangerous to even consider. We used to be able to ride in neighbour's orchards, but that has all changed due to the stringent rules around Health and Safety and the crippling financial penalties that can be imposed if there is an accident on their property.</p> <p>Farmers have also closed their properties to horse riders with discovery of the disease Mycoplasma Bovis in an effort to prevent the disease spreading to their farm.</p> <p>Horse riders in the Western Bay area have very few safe areas they can ride, so Tuapiro which is so safe gets used considerably which demonstrates the need for such areas in our community. Why doesn't the council follow Tauranga City Councils lead and open up all the beaches to horses, with a few obvious exceptions and then you would cut down the traffic at Tuapiro.</p>
		440	Lisa Coulson	Council is required to provide appropriate recreational resources for ALL their community. The other options offered to us are no substitute for Tuapiro. Support and responsibility to the equestrian community is sadly lacking
		442	Katherine Le Petit	<p>Council should stick with this option. I believe the increase in horses at Tuapiro is directly as a result of closing Te Puna. If the bylaw change goes through it will mean more horses on the other beaches then there will be call to ban horses from them also.</p> <p>Council is required to provide fair and reasonable access to recreation facilities. The other riding venues offered by council are not suitable or safe for many riders and horses. Tuapiro does cost the council like facilities for other sport e.g. cycling, rugby etc</p>
		443	Lisa Daly	I DO NOT support changes to bylaw that would exclude horses on tuapiro as horse riding spaces are minimal and hard to find.
		444	Sally Jane Goodyear	<p>Sadly there are fewer and fewer places locally where we can safely ride our horses. Farms have been subdivided; with concerns about health and safety and following PSA many orchards and land owners discourage anyone entering their property. TECT Park is a 1½ hour drive each way over the Kaimais. The land between Thompson's Track and Lund Road has potential to be a good place for experienced riders on fit horses, but is no substitute for Tuapiro as it is steep, challenging terrain, often slippery and overgrown with weeds. Horse riders have the same problems on the roads as cyclists. We applaud the decision by WBOPDC to spend \$3million on cycleways over the next 3 years. We look forward to being able to share some of these cycleways. In Europe, even in the most built-up areas, there are countless parks and reserves where cyclists, walkers and horse riders all "share with care".</p>
		446	Neil Woodward	We are getting forced off riding in Kiwifruit Orchards due to the Kiwifruit disease PSA and now Dairy Farms due to Micoplasma Bovis. Riding on the roads is dangerous due to a lot of the drivers having no respect for animals on the road, passing too close and driving too close to our horses. Tuapiro Beach is a safe environment for us to ride, have fun with our family and fellow riders.
		447	Susan Woodcock	<p>I do not support the banning of horses at Tuapiro Beach and any other beach where we have access to.</p> <p>New Zealand has a coastline of 15000km. Where horse riders ride at this beach is only 2.3km 0.02% of our coastline. Is this really asking too much to allow horse riding to continue there.</p> <p>Places for horse riding is becoming less and less, this is not good for our sport. It is not like just being able to jump on your bike and go out your gate and ride up the road. Bikes do not get frights from traffic or dogs barking behind hedges. Safety is the biggest factor for horse riding and as private farms and orchards are shutting their gates to all (not only horse riders) then where do we go.</p>
		450	Fleming, Katie	We now live in an era where there is little remaining farm land, new subdivisions have taken over a lot of land and there are few places remaining in our area that are safe to ride in. Country roads are no longer safe, due to high vehicle volumes and the removal of the wide verges that once allowed horses and vehicles safe distances between them.
		451	Jacobson, Lachlan	There are very few areas in Western Bay where horses can ride so I have difficulty understanding why council would place more restrictions on horse riders. Council spends a lot of money providing other sport recreational areas for the public, where Tuapiro is in our back yard and free, but just needs to remain accessible for all.
		455	Julie Anne Malcolm	<p>Beaches such as Tuapiro are important to provide recreational opportunities to many sectors of society.</p> <p>Horse owners and riders are but one sector of society. As the country becomes more populated there are less and less places where horse riders can safely ride - roads which were once great places for exercising riders and horses are in many places generally now too busy to be safe.</p>

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		460	Angela ODonnell	As the local Riding for Disabled organisation in Tauranga there are very few places we can take our horses for some much needed mental stimulation outside of their day to day routine. Our horses are well cared for and managed and as part of their well-being we have to take them off our property to give them a change in environment to keep them mentally and physically stimulated.
		461	Brianna Shaw	I do not support the changes to the draft reserves and facilities by law because it is fun to swim the horses and it is a safe place to ride because most beaches are too noisy or aren't suitable for riding or we are not allowed to ride. Everyone should be able to access and enjoy the beach.
		465	Kym Lang	I do not support the changes as I believe beaches, reserves and facilities should be shared by all. We horse ride frequently at Tuapiro and Waihi Beach at least twice a week and often do not see another person. If we do it's usually someone else riding or walking their dogs. There are restrictions already in place so that all can share.
		466	Melanie Drumm	Riding on the beach is a big part of rural NZ lifestyle and even more important now the roads are so busy and dangerous for horses, and for motorists trying to pass a horse on a busy road. Horse riders know they must look after the reserves, park in designated areas, clean up droppings, and behave safely and courteously when riding on the beach or swimming the horses.
		469	Kyrie Gausden	New Zealand has a strong sporting culture which includes gold medal equestrian performances at Olympic and World Equestrian Games level. Our horse riders NEED facilities and venues on which to train and exercise their horses.
		470	Gene Jacobson	Our roads are now too dangerous to even consider. Orchards are now closed due to the stringent rules around Health and Safety and the crippling financial penalties that can be imposed if there is an accident on their property. Farmers have also closed their properties to horse riders with discovery of the disease Mycoplasma Bovis in an effort to prevent the disease spreading to their farm.
		473	Kiani Taylor	I do because I believe it is a not only a good natural place for us to ride our Horses but we do not have many places to ride our horses that is peaceful for the horses and different in comparison to the usual sand arena we ride in.
		474	Nicola Parker-Webb	I do not support the changes as it is important for horse riders to maintain access to facilities such as beaches No changes to current beach access
		475	Tina Fagan	It only further widens the divide between "town and country" in a district that should support recreational outdoor activities, exercise, health and wellbeing. Recreational horse riding has been enjoyed by people for many decades. Horse riding promotes exercise, responsibility and safety. Also has no harmful affects to the environment and is a tradition that is not only enjoyed by the rider but often by those watching.
		478	Williams, Thelma Florence	In 2018 it is high time we learned share our resources and assets and make plans for the future that include multi-use of our facilities.
		489	Guy, Ronald Duncan	Roads become dangerous and farms are being closed through Health & Safety.
		494	Cosson, Paul Terry and Cosson, Angela	We feel so privileged to live in a country as beautiful as New Zealand and in the beautiful area we do, where we can take advantage of such a unique environment and lifestyle. Being able to ride your horse on the beach is part of that.
		494	Cosson, Paul Terry and Cosson, Angela	We are always very careful when we take our horses to the beach or anywhere for that matter. We drive carefully, have good gear, healthy animals that we love, and we always respect the facilities.
		499	Rogers, Leonie Marie	The closure of the permitted area at Tuapiro to ride a horse will put unnecessary pressure on the other riding beach areas that have been allocated for permitted riding within the WBOPD
		501	Rogers, Peter Wayne	Horses should be allowed at Tuapiro, Waihi Beach, Athenree Estuary. Horse people need a place to ride their horses off legal roads, its safer than being on the roads and cycleways.
		503	Rogers, Alayna	If horse riding was banned at Tuapiro the people who ride at Tuapiro would have to drive to other beaches such as Waihi Beach, this would put a large amount of pressure on the other areas as there would be an increased use on the area. The main pressures would be parking facilities at the areas, the end of Broadway road has little to no parking spaces for horse trucks and floats, causing drivers to park and tie up their horses on the side of the road, thus leading to further hazards for road users and pedestrians using the road. At Tuapiro this is not an issue as there is a large parking area for horse trucks and floats.
		503	Rogers, Alayna	The proposed horse riding, cycling and walking area to be established at Lund road would take many years of (work) until it is up to standard and is safe to ride on and this would also be a very costly process, riders would need a safe area to ride in the interim if the bylaw was to be changed to ban horses on Tuapiro point.
		503	Rogers, Alayna	There would be many negative effects for both the riders and community if horses were banned from Tuapiro. With no other designated riding areas in close proximity to Katikati local riders would be forced to ride on public roads which would be an major safety hazard for both drivers, pedestrians, horses and riders.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		506	Pooley, Lara	There are very few areas for horse riding in the Katikati/ Waihi Beach area.
		509	Free, Diane Jean	Unfortunately places to ride are becoming more and more limited. Riding on the road has become very dangerous, and with increased Health and Safety requirements, people are reluctant to allow horse riding on their properties.
		513	Warren, Deborah Elizabeth	Horses should be allowed on the beaches as a safe recreational area.
		517	Symes, Jamie	We can't ride at many farms or orchards any more because of cow disease and health and safety laws, and that is why I plead to be able to ride at Tuapiro Beach.
		518	Symes, Adam	We are not allowed on many farms or orchards any more
		522	Heibner, Philip Norman	Beach riding has been a significant aspect of the culture of many New Zealanders. The opportunity to use and enjoy our great outdoors is integral to being a New Zealander.
		522	Heibner, Philip Norman	The Council has a responsibility to provide suitable safe recreational areas for all recreational activities.
		523	Sharfe, Bethany	The Council should provide safe areas for all recreational activities including beach riding
		532	Mercer, Janice	Council reserves and facilities are for the benefit and enjoyment of everyone, including horse riders. The closure of this area will limit the allowable places to ride and therefore place greater stress through increased usage on the few remaining permitted areas.
		534	Jones, Miriam Louise	The council should be also considering the difficulty of terrain etc when considering establishing additional areas for riding.
		540	Jones, Lloyd William	If the Council reopened areas around the estuary of Bowentown and developed other areas with terrain suitable for all levels of horse rider there would be no problem of congestion in future years.
		542	Walford, R and Meek, SS	Horse riders of all ages are finding fewer and fewer places to ride their beloved steeds in complete safety. To ride on any public road is becoming far too dangerous because of speed and volume of traffic. TECT park and the proposed reserve adjacent to Lund Rd is no substitute for Tuapiro...reasons. Horse riders have fewer and fewer places to ride and need more not less
		545	Tauranga Adult Riding Club	General uncertainty in the club where members can ride. Beaches closing, farm being closed through Health and Safety issues. Tauranga racecourse looked at for housing.
		546	Rousell, Andrew John	It is unfair that the horseriders are targeted. Beaches are for the whole community to enjoy
		549	Boyd, Tina Claire	Proposed change does not have the good of the community at heart, instead only considering one part of the community
		549	Boyd, Tina Claire	The alternative riding site at Lund Road is neither desirable nor achievable for many riders due to its steep terrain. I have never seen horses amongst the trees whereas I have seen motorbikes.
		553	Merrin, Hayley	The roads are not safe for young riders (like me), nervous riders and even more experienced rider with a young/green horse. I believe that if the Western BOP Council permits this great injustice to the equestrian community the young riders will grow up scared to leave an arena and therefore will not only lose their confidence but their horse or pony will become bored and lose their engagement. The Council says that there are 5 other beaches that we can take our horses to ride on, the way us riders see it is that two of these beaches are the same beach (waihi beach), waihi has large surf which is extremely scary for horses who have not experienced waves before. A further two beaches have sinking sand which is very dangerous for both horse and rider. And for the last of the five beaches is more than a 2 hours drive away from Tuapiro and also has waves although they are smaller than those at waihi beach
		557	Johnson, David Samuel Noel	I think horses and riders should be able to use our beaches
		558	Pountney, Margaret Jean and Pountney, Jenny	Please let us all, horses, dogs and people enjoy the beaches. The sea water is so good for horse's feet and legs. Everyone should be able to enjoy our sea shore
		559	Merrin, Marian Irene	We live in a community where many of its members keep horses and ride horses. It is the Council's role to provide and maintain services and facilities that accommodated the needs of the community it represents. The TECT Park has a very long way to go before it is anywhere near an ideal destination for horse riding. The trails are narrow, often steep and difficult and the footing is terrible in places either from slippery clay or large stones/gravel. The tracks are poorly signposted which makes for some frustrating and pointless backtracking and getting lost more often than not. Then there are the other beaches offered up as alternatives. All good and well, but horse people know about the sinking sand and big waves once again we have the ideal Tuapiro offering everything wanted with none of the dangers.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		564	Sellar, Lisa Jane	I believe we need public spaces for horse riders or dog walkers
		567	Bode, Lynn	Katikati has a very special place in my memories as I always have to think of the awesome adventures we had at the beach with the horses. Being able to ride on the beach is a significant point for students like me to go to Katikati and spent their time abroad in this town
		569	Hesse, Dominique	My very first ride in New Zealand was along the road and next to some hotwires. Because of some mad drivers who speeded along quite close to the horse sometimes they got really nervous and I'm not going to lie, I was nervous too. So the beach was very welcoming, safe, enjoyable and fun
		570	Symes, Charles Wymond	Banning horses will be the Trojan Horse (pun intended) for banning other recreational users of the area and banning horse riders from other public places
		573	Dawson, Allan Donald	Safe riding places are increasingly difficult to find. The danger of riding on the roadside has increased considerably in recent years and Council has given little or no thought to access along roadside berms on country roads or the provision of "bride ways" as many other countries and some other Councils have successfully integrated into their plans. Farmers are also reluctant to allow access to their properties; often sighting Health and Safety issues and more recently Micoplasma bovis transfer
		574	Suzie Aitken	Community coastal areas are for recreation such as horse riding, dog walking, boating and fishing and that makes communities special. We live in a society that is now encouraging people to be active, get off the couch and get outdoors. Horse riding is a great way of doing this. Roads these days are becoming far too dangerous to ride horses on so to have a safe place to ride is needed.
		577	Murray, Alicia-Marie	Support horses being allowed at Western Bay.
		582	Jones, Patricia	Western Bay is becoming increasingly urbanised and it is no longer safe to ride along the coast. There are limited spaces available for safe riding. We encourage our children to horse ride which is a healthy outdoor activity and builds resilience and good habits.
		584	Tate, Merryn Ellen	We are seeing less and less places to ride slowly happening over the years. As a fair council invested in providing opportunities for recreational activities I'm asking that you continue to uphold the bylaw that allows us to ride in the designated areas on the beaches throughout our local region.
		587	Sandbrook, Gloria	We as riders do appreciate a safe place to ride which is getting few and far between. It is unsafe to ride on roads. Over the years many facilities have been withdrawn for safe riding.
		589	O'donnell, Angela	[Tuapiro Point] it is the only place that I can take my old horse. Every where else is too strenuous for him. There appears to be no access for horses to any beaches around the BOP any more. All access to Papamoa Beach has been taken away, it sounds like we won't have access to Waihi Beach either
		596	Cowern, James Mcleod	Support horse riding and would like to see a horse riding trail extend along the harbour edge as far as possible.
		597	Faber, Emma	It is very difficult to find safe places to ride these days. horses need space to move away when sharing space with cyclists and dog walkers, beaches are one of the few places where this is possible.
		599	Hood, Eileen Joyce	I believe that there is a shortage of safe open spaces with access to the sea water where one can enjoy the freedom and benefits of exercising horses in the Western Bay of Plenty.
		600	Boler, Mrs	It is vitally important to our culture and community to keep access to our beaches for all activities including horse riding. This has been part of our heritage and culture for generations.
		606	Bennie, Sally Claire	Access to community coastal areas for recreation such as dog walking, horse riding, boating and fishing makes our community special.
		607	Balneaves, Lisa	Horse riding on a beach is a privilege and as a former beach rider myself.
		608	Stadler, Angelika	There is a large riding community in the area and it is getting harder to find places to ride horses.
		609	Wiggins, Lisa	NZ is fast loosing what kiwis are about. Riding and swimming horses at the beach is one of these things. Our roads have become fast and dangerous that we no longer feel safe riding there.
		615	Summerell, Maureen Eddy	Beaches should be for everyone to use, most people are responsible and clean up after themselves.
		618	Schlegel, Mark	I see no reason to reduce the already limited areas available for responsible riders to enjoy the beach.
		619	Katikati Hack & Hunters Adult Riding Club	Sadley there are fewer and fewer places locally where we can safely ride our horses. The land between Lund Road and Thompsons track has potential to be a good place for experienced riders on fit horses but is no substitute for Tuapiro Point.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
4: Bylaw information		4	England, Paul Frederick	I often tgo to Tuapiro and have never ever seen any marked area identifying Tapu area
		6	Besley, Peter Andrew	I have regularly gone to Tuapiro with a riding group and have never taken any note of any signage explaining where/when(?) horses can ride. If I had known exactly which areas were tapu I would not have allowed my 'party' to ride there.
		16	Paterson, Keri-Leigh	The ancestral ground within the forestry we are now being told about needs to be officially identified, signposted and fenced securely to ensure all animals and humans stay away from this area. I do not think any horse riders have any issue with this.
		23	Latham, Susan	I'm sure with correct and adequate signage we would stay out of 4 respect of the areas of cultural importance to Iwi.
		35	Goodwin, Kathryn Frances	Each user of the reserve and facilities should leave the area clean and tidy. Specifically no horse poo. (But this has not been a problem).
		83	Diana Stein	I understand that most riders (including me) have been riding outside the marked areas in the past and I was very shocked when I was made aware of this. I am a law-abiding citizen and felt bad that I must have been contributing to having the bylaw reviewed. After intense study of the signs at Tuapiro I am still not sure where exactly we are allowed to ride. I am not sure where exactly the low tide mark is? Is this 5,10,15 or 20 metres from the shoreline? It is really important that the signage is improved and very clear with no room for guessing. I want to do the right thing! I would like to know if there is anything else that we horse riders need to be aware of - other than staying in the marked areas - to respectfully treat the Maori culture while we are riding there? I am always keen to learn and on paying respect to the Maori culture. Although we oppose the banning of horses, we do respect and understand the cultural sensitivities of this situation and would like to find ways of working with iwi and council so horse riders can remain riding at Tuapiro.
		94	Kite, Andrea Louise	The Signs doen at Tuapiro are not clear - the sign indicates at one point ride below the low tide mark - that would put you in the harbour - and potentially it is soft out there and dangerous.
		129	Susan Tighe	I have witnessed inconsiderate driving down the beach and onto the end of the point late at night when I have been freedom camping in the designated area. This causes more damage and erosion than horses as well as deliberate acts of hooliganism designed to wake campers at 3 am. I suggest energy is directed towards this rather than law abiding horse riders.
		270	Rowan George Bullock	Insufficient communication to the local resident from council. A reliance on public notices is below par for a council that wants transparency and community involvement.
		276	Vivien Dostine	There is no information for horse riders to easily find on the Council website. If there are rules for riding in parks, on beaches or elsewhere, then this needs to be made available - and in an easily understood form (not bylaw gobbledegook). Riders using the area below low tide would quite rightly question whether the District Council bylaws have any jurisdiction over them at all given that this would surely fall into the Marine and Coastal area act where everyone has the right to engage in recreational activities in or on the common marine and coastal area.
		312	Richardson, Sheryl Frances	Access to the New Zealand outdoors is part of who we are and a large part of our nation's heritage and culture and enjoyment of the same is seen as the birthright of all
		314	Burnett, Richard Macpherson	I feel that we the people should be able to access the beach on anything we choose as long as it is not a vehicle. And I'm sure over the last hundred years people have had horses to get around the coast
		357	Catherine Meech	The signage for the riding area is extremely poorly written and easily misintrepreted. There is no sign posting on the riding trails and there is NO signage indictating either the areas of cultural significance or the reason for the significance. This is a great shame as it deprives all users of the beach a full understanding of the significance of the area.
		377	Warren Grant	We always pick up the manure and thought we were sticking to the permitted areas but find the signs ambiguous.
		409	David Roy Ryan	I do not support the proposed change to the bylaw that would ban horses from using Tuapiro Beach. The proposed change is discriminatory against freedom of movement.
477	Bostock, Robert Alec	These so called bylaw will affect my children and others in the future, next you will tell us we cant swim in the sea.		
488	Brass, Wiki	The signage at Tuapiro for horses - riding where. boundaries, parking, are very poor		
490	Denize, Genevieve	The WBOP has not considered all reasonably practicable options in accordance with section 77 of the LGA.		

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		499	Rogers, Leonie Marie	WBOPD needs to PLAN to create a unity between these multi-cultural PEOPLE. Working together with mitigation measures to achieve unity throughout cultures is PROGRESS.
		500	Flynn, Bronwyn Ann	The Draft Reserves and Facilities Bylaw 2018, I see as a further encroachment to the democracy New Zealanders have been blessed with for many years but is fast being eroded and tied up in red tape.
		502	Flynn, Micil William	Restrictions will erode at the traditional way of life - recreation in New Zealand
		511	Free, Andrew Garth	I find it difficult to believe in this day and age one person (Riki Nelson) can put down on paper their views with no scientific proof to back up their opinions on the subject. I find it even more DISTURBING that the COUNCIL are willing to change the bylaw on this one report.
		543	Clarke, Janice Ann	I believe horses should be allowed at Tuapiro Point under the current by-law. I also believe that the Council is allowing a few of the vocal minority (including Councillors) to invoke change against the wishes of the (generally) non vocal majority
		580	Heibner, Bernadette Madeline	I believe we should be respectful of others beliefs and feelings/ culture and I recognise the strong link that local Iwi have with Tuapiro Point. However, I believe Council has a responsibility to be promoting and facilitating a negotiation process rather than a blanket ban

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
RFB18-03: Potential changes	1: Signage	5	Bongard, Shirley Ann	Improve signage in relation to horses
		6	Besley, Peter Andrew	Conditions of use of reserves for activities and as horse riding need to be adequately 'signed' i.e. signage and explanation around restrictions need to be clear. I would like to see clearer signage and mapping to show exclusion areas (i.e. culturally sensitive areas). Current signage/mapping inadequate and confusing.
		7	Besley, Samantha	More signage
		8	Besley, Amanda Wendy	More signage by council
		9	Saville, Arthur	Better information for visitors about where you can go and your behaviour required for using this site. e.g. not riding through areas where there are lots of people.
		18	Birkett, Bev	Good clear signage where they can ride. Allocate areas for recreations.
		25	Katrina Stephenson	Keep the bylaw as it is but perhaps better signage and monitoring by council staff remind/fine those members of the public not adhering to the bylaw.
		29	Anita Kelly	Surely the answer is simple, make the current guidelines and map clearer, so everyone can understand them and let everyone enjoy Tuapiro.
		30	Andrew Gorringe	I believe any possible problems that may be occurring with conflicting use of this area can be resolved with clearer, more logical signage and communication with all parties involved.
		33	McLean, Fay Maree	Better signage as to where to ride and avoid.
		37	Gail Grant	I would agree to more signs letting horse riders know to pick up their horses manure from the grass recreation area, and to not enter any restricted areas. A big sign of dos and donts near where people park would be useful.
		38	Debbie Firth	I would like to see better markers and signage to show the riders where they are not allowed to ride - and why! eg: 'do not pass this point - significant ecological area being monitored'
		39	Marie McLean	Maybe fencing the area in question with more signage would be of benefit.
		45	Ben Sapsford	Allow horses at Tuapiro - simple changes to signage should be sufficient to appease both parties.
		47	Fay Ann Burke	I would like to see signage improved so it is clear where riders may ride and why they shouldn't ride on areas they are excluded from.
		48	Rachel Alice Purcell	there does need to be more signage as the where we can ride an can't as the ones that are there are griffitted an unread able an not very helpful, would be nice to have clear signs as where to park an to clean up after yourself
		51	Allison mathers	I would like horses to continue to be allowed on the beach. With improved large signage and fenced off areas where horses are not to go.
		53	Carolynn WEST	Provide better signage saying not to leave horse manure in the parking area, and identify the area with signage where horses can not be ridden due to fishery restrictions. Education is the key in this situation, not a blanket ban.
		60	Leanne Parrott	Maybe put more signs up at the reserve, indicating the dos and donts and where not to ride.
		73	Anne McNabb	Give clear instructions as to where horses can be ridden so there is no misunderstanding and make it more visible where the areas of 'off-limits' are so we can share this amazing environment.
76	Christian	I think the preset bye law has been working very well and perhaps a more proactive enforcement with good signage is all that is needed.		
83	Diana Stein	As far as we are aware there is lots of confusion around signage. Clear signage for parking, the loop trail and behaviour on the trail would leave no room for second guessing and avoid potential cause of problems. Also the signs need to be at the entrance of the parking area so they can't be overlooked. Fines for individuals who don't obey to the rules, will deter bad behaviour.		
84	Diana Stein	As far as we are aware there is lots of confusion around signage. Clear signage for parking, the loop trail and behaviour on the trail would leave no room for second guessing and avoid potential cause of problems. Also the signs need to be at the entrance of the parking area so they can't be overlooked. Fines for individuals who don't obey to the rules, will deter bad behaviour.		
89	Gail and Murray Piper	The signage for the horses at Tuapiro should be clearer so that riders and owners can understand exactly what they mean. At the moment some of the signs are not even legible.		
90	Alisha Parkin	Improved signage showing areas of cultural significance and areas that require environmental protection.		

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		94	Kite, Andrea Louise	Update the signs so it is clear where horse riders can ride - and make the rules fair for them so they can also enjoy the beach. Updated signage could include riders must ride below the high tide mark, but no further than say 100 meters put from the high tide mark - towards the low tide mark as you go down towards the point.
		102	Sanders, Elizabeth	Better signage at Tuapiro to enable us to follow the rules. It is very confusing as it stands.
		107	Oliver, Joy	The signage needs to be clarified.
		115	Steve Allan	I agree that historical features need to be protected, but I believe simple unobtrusive signage would bring about the results of protecting the historical feature and keep the shellfish safe.
		116	Stephen O'Donnell	consideration of control options vice outright banning - warning signs for fines for leaving any waste behind - warning signs for fines for riding within reserved protected areas - waste bins (could be used for composting) as simple as barrels for waste removal
		117	Morgan Lee Trubshaw	I would like to see more signage to remind riders not to ride in the pine area and why and to remind people to pick up the poo. Perhaps you could have to buy a yearly pass/permit to ride down there and that you sign saying you will respect not riding in the pines and pick up all horse poo.
		118	Sara Elliott-Warren	Better signage and fences would make so much difference in solving whatever problems there are.
		126	Janice Tetley-Jones	I would like to see clear signage. To continue to be allowed to ride in the water and along the beach. Happy to pick up droppings.
		130	Stephanie Hume	Tracks should be made available and be well marked for all recreational activities.
		131	Hall, Marion Morag Elizabeth	If there is such a place [burials], then clear marking would be helpful and fencing off/whatever is appropriate to show the same.
		138	Liselle Marie Dennett	I think putting signs and barriers to educate everyone on the rules and culture significance of the area is a must, so we know where we can and can't ride. Then instead of just banning the horses, this could be the start of us all living in harmony together. You could lead the way WBDC. Thank you for your time.
		144	June Soby	Please make the sign easy to understand and the rules surrounding the Reserve as easy as possible to adhere to. Make it plain in simple language where the horses are allowed to walk or canter as the case may be and request that the rider or person leading the horse pick up any droppings.
		146	Sian Manning	Would like to see better signage erected to target horse riders. It appears that the majority of horse riders at Tuapiro have misinterpreted current inadequate signage. • Signage should be bigger and placed in the correct areas to reach all potential horse riders • Signage should show where cultural areas of significance are located. • Signage should clearly define areas where horses can and cannot be ridden • Signage to indicate appropriate parking for horse floats should be included • Signage should be added to indicate acceptable/appropriate horse riding behaviours for safety for all beach users (speed/vicinity to others/dogs etc)
		149	Claudia Cameron	Clearer signage so riders do not upset local people by accidentally riding in the wrong place.
		151	Nigel Rice	Provide all riders with clear instructions on how to ride respectfully. Much of the issues here seem to be due to ignorance. This can be through signage, website, licensing.
		155	Anton Brett Turnwald	Horse users should be reminded with large signs of the cultural significance of the point over the last 150 years
		156	Andrew Hollis	As there appears to be no danger from impact to kaimoana beds at Tuapiro Point there is no need to define riding areas below high tide mark at the location at all. At all areas where damage to native birdlife may occur signs and fencing ought to be employed.
		158	Anton Leo Turnwald	I would like to see a lot more signs around tuapiro beach because currently there are very little signs at the beach and we do not know where we can and can't ride
		159	Rebecca Tasker	Permitted riding areas - just clearly communicate where we can ride - any "rule breaking" is coming about through ignorance not deliberate intent to cause damage. the signage is VERY poor - it is unclear as to where riders are expected to stay (low tide line? high tide? In between?). This would be an easy thing to resolve.
		162	Amy Gough	more clear signage as to where we are aloud to ride as all of us want to work with the public and the locals as much as we can.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		164	jill jackson	Signage that explains exactly what is expected
		176	KIM CAWTE	IF THERE ARE AREAS WHERE HORSES SHOULD NOT BE RIDDEN, THESE SHOULD BE ROPED OFF WITH CLEAR SIGNAGE.
		179	Bethany Bennie	Clearer signage (including signs or maps of kaimoana beds to be avoided - even temporary signs if the beds move) and a horse waste disposal may help prevent on-going damage.
		182	Anita Shirley Gray	If horse riding is permitted to continue at Tuapiro I would like to see much better signage at the locality with clear instructions as to where horses are allowed to go. There is definite confusion in the current situation which has led to riders inadvertently upsetting people who are more familiar with the rules.
		184	Maya Frost Lyon	By all means put signs up requesting respectful behaviour but please don't stop or restrict access we have to this perfect slice of horse riding paradise.
		186	Paula Henderson	Better signage, signage showing where cultural areas of significance are located, fence of areas
		194	Mitchell, Nadeen	Update the signs so it is clear where horse riders can ride. There seems to be a lot of confusion over where horses are permitted. If there is no proved risk to shellfish then it makes no sense to restrict areas based on this.
		196	Cameron, Louise May	I believe it can be managed and horses and riders can use along with the public
		196	Cameron, Louise May	How ever there should be certain entry and exit points clearly sign posted that horse and rider can use for access to beach similar to Waihi Beach
		198	Martin, Paul	More monitoring of signage of the amount of horse traffic allowed on the beach would solve the issues and still keep people's rights alive and keeping all cultural rights alive for our next generation of people, having no signs stating the amount of hoses people just use at will.
		210	Katrena Ritchie	Clearer signage of location horses can be ridden taking into account safety of riders in regards to boggy areas.
		221	Sarah Ellesmere	So long as riders are clear as to where they may ride and best efforts will be made to collect waste produced by their equines, they should be allowed to continue. Continue to allow horse riding with current rules in place outlined clearly for ALL riders(some who may be new to the area).
		224	Joanne Hume	I believe there needs to be better signage and information about the areas that are permitted or non permitted for horses to be as there seems to be a lot of confusion. The trail starts and ends from on the beach, so where do horses access the beach? Are horses permitted on grass areas?
		227	Natasha Pearce	Clear concise images and wording as to where horses are allowed.
		231	sarah rice	4. Clear instructions be added to existing visitor signs. Signage and easily accessible information on WBOPDC Website dictating route, rules and parking instructions be clearly displayed at the entrance to our beaches and reserves.
		236	Jude Russell	For those parties concerned re contamination to their kaimoana perhaps they should care more about the multitude of black swans defecating in the ocean at Tuapiro Point.
		245	Darinee Turnwald	More signs are needed where the HORSES can ride.
		246	Kylie Dombroski	Better sinage to show where we are able to ride as I have been confused of where we are permitted to ride.
		248	Deb Garner	Better signage, signage showing where cultural areas of significance are located and these areas maintained properly, fenced off areas - with proper fences.
		250	Debbie Perkins	There is great confusion about where we are allowed to ride. The sign is very unclear. I would never deliberately ride outside the designated area, and would respect all boundaries.
		253	Riley Warren	The signs at Tuapiro are confusing - I cannot tell where I am not allowed to ride. so they do need to be made clearer for us kids to know were we are not allowed to go. my mum also told me that there are shellfish beds around the point so it would be alright if were not allowed to ride there so maybe point it out or put cones around the area.
		263	Ellie Harrison	The map that shows where riders can go is still very unclear and there is a lot of confusion about whether we ride on the grass or the beach area, where to park if you arrive and havn't been there before and then where to ride low tide line/high tide line?? Better signage showing where NOT to ride would be great, that way we can really respect those areas that should not be ridden on.
		276	Vivien Dostine	That all rules or restrictions are written in plain english.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		278	Marguerite Pienaar-Pawlak	Better signage to show us where we are allowed to park, ride, etc. We don't want to offend anyone and would like to work with local iwi and the council.
		287	Jodie Thorne	Horses allowed at Tuapiro with clearer signage as to where we can and can't ride.
		312	Richardson, Sheryl	Better signage at Tuapiro to show where to ride
		313	Richardson, Alisse	I would like to see better signage as to where we are supposed to go
		316	Bateman, Rochelle Lynn	Unfortunately the map of where you are able to ride is unclear. Horse riders are very respectable people and land lovers who would not purposely ride our of where it is permitted, so signage is very important.
		317	Bateman, Katelyn	It doesn't clearly say we're not allowed to go, so clearer signs
		318	Bateman, Luci	I think better signage is needed to show people where they can and can't ride. This will allow the cultural places to be left untouched by the horses. Also a sign in the main parking area telling people to pick up their horse poo, as some do not know.
		321	Vastre, Rebecca	Clear signage indicating area permitted for horse riding
		324	Overton, Jeanine Louise	Safety concerns as to surface (boggy areas) be remedied, so horses and riders, or other users, can be safe.
		324	Overton, Jeanine Louise	Improved signage: for all users. What is currently there is open to varied interpretation.
		328	Suzanne Trask and Mark Schlegel	Many riders have reported that signage is not clear about where they are allowed to go, and thought that where they were riding was allowed. With clearer signage and rules, I am sure that all riders (Tauranga Pony Club included) would happily stick to the boundaries in return for the privilege of using the beach. If kaimoana beds were perhaps fenced off or marked, riders would also be considerate of these.
		372	Sarah Rice - Otumoetai Pony Club	There are good examples of signs and systems that educate riders and cyclists how best to behave and show respect to each other and I am happy to share ideas on how best to achieve this.
		381	Henrietta Davenport	I would like better sign posts so we know where we can ride without upsetting people. I would like to know where the burial ground is so we can avoid it, and also a sign so I can learn about the history of the area.
		385	Tammy Courtney	Better signage showing where you can and cannot ride horses and showing the rules more clearly.
		389	Sonja Gordon	Better signage for where we are allowed to ride the current signage is very confusing & even council can't clarify. Signage showing where the cultural areas of significance are located. The Trees that are fallen down at the northern point to be cleared. A bin for horse manure to be put into and sold to a garden place for garden fertilizer.
		392	Karena Murray	Horses to be allowed to ride at Tuapiro with clear signage of where riding is allowed.
		393	Denyse Cambie	We acknowledge that we have not always followed the rules however everyone I have spoken to agrees that we incorrectly thought we were not allowed on the grass and were allowed to ride anywhere below the high tide mark. And that the signs are ambiguous e.g. the sandy area just around the point appears to be included in the permitted area due to the no horses sign being near the pines furthest from the point. Tuapiro does not require any further financial input from council (apart from a clearer sign showing permitted areas and also where the kaimoana beds are, if they are ever identified) and perhaps removal of the fallen trees.
		393	Denyse Cambie	One possibility during the period 1 December to 31 January would be to restrict horses and floats to the left hand side of the boat ramp. This is not suitable at other times as it is too soft, but over Christmas the ground is harder. Perhaps bins for horse manure (even though it is just reconstituted grass unlike dog or cat poo) could also be trialled during this period.
		397	Vanessa Coster	Clear signage
		398	Catherin Turnbull	I think there needs to be a better map and signs showing where you feel the permitted riding area is and why. I'd like to see this stay as a safe and easy place to ride
		399	Glenys Vivien Daley	The map which is included in the bylaw and on the noticeboard at Tuapiro also cannot be taken seriously. Its message is confused. It shows a yellow dotted line on the eastern side of the spit, marked 'Ride at low tide mark'. This line, however, is drawn on the foreshore, nowhere near the low tide mark, and the sign itself says that horses may be ridden along the foreshore. Any sign needs to be placed where riders enter the proposed loop trail (not at the end of the trail). Instructions limiting the use of the reserve need to be both clear and realistic.
		406	Ian James Gray	Better signage at Tuapiro so that the horse riding community are able to stick to the places they are allowed and therefore not encroach onto protected or sensitive areas.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		407	Kate Brown	I find the current signposting at Tuapiro Point displaying the designated riding areas confusing and hard to follow. I believe this should be made clearer so that there is no risk to the kaimoana beds in the area and riders understand where the permitted areas are and how far from the high tide line they extend. The vast majority of riders recognise what a precious resource Tuapiro Point is and I believe with clearer signposting the current by-laws would be followed.
		412	Hannah Allwood	Some of this behaviour could be explained by the ambiguity of the signage at Tuapiro Point (see figure 1, attached) which leaves the riding zones open to interpretation (many of us believed we were NOT supposed to ride on the mown grass verge as complaints have previously come from the people who own the houses on the waterfront). I believe there needs to be clear signage outlining EXACTLY what is expected of people who ride in this area (such as a set list of rules, e.g all horse poo must be picked up, no rider must go in the forest etc) and the EXACT area where we are allowed and not allowed to ride. A guideline of the location of the significant cultural and ecological areas will also ensure people understand the importance of following these set rules
		417	Aden Alyssa Dene Manning	Better signage/ maps would help riders understand where they can and cannot ride, aswell as clearly stating what might happen if they do not keep to the designated riding areas.
		423	Katherine Bell	Instead of stopping riders from riding at turapiro, how about trying to educate everyone as to the rules (where to ride) and making it easier to obey them /know what they are (sign visibility).
		424	Kylie McKee	Tuapiro beach is not banned to horse riders, instead there will be signs and fences erected to protect the urupa
		428	Lisa Dorothy Jane Hansen	If anything, better signage of where the horses should and should not be to stay clear of the shellfish beds (similar to the signpost at Huarua Park.)
		432	Chris Fotheringhame	Although there is signage at the reserve the map is very difficult to intepret particularly for newcomers to the area. Better signage and marking of areas may better support the 2012 bylaw.
		434	Steve Allan	I believe a few well placed signs on where horses and families can ride would alleviate all the problems raised. I agree that historical features need to be protected, but I believe simple unobtrusive signage would bring about the results of protecting the historical feature and keep the shellfish safe.
		439	Barbara Jacobson	All cultural sites need to be identified and registered so all people can respect these areas, not just horse riders. Put up an information board informing the public of the history of Tuapiro and locate the sacred areas for all to respect. Improve the signage so we all understand the areas horses are allowed and there is no ambiguity or confusion.
		442	Katherine Le Petit	in line with this at Tuaprio I would like the culturally significant area /kaimoana beds to be identified and to be ride all areas at Tuaprio apart from those marked. ** I would like clearer signage clearly explaining the reason that areas are culturally significant.
		443	Lisa Daly	I would like to see signage for horse riders as there is none or minimal at present. Horse riders do not want to loose these places to ride and most if not all would abide by rules if they knew what they are.
		444	Sally Jane Goodyear	Horse riders have been badly let down by the signage at Tuapiro. Clear signs marking where kaimoana beds are located and where riders are and are not allowed are key to making sure all parties are informed and key areas are respected.
		445	MICHELLE RAITAK	Please improve the signage but ensure that a rider that uses Tuapiro is included so it makes sense to those it is intended for.
		449	Megan J Richards	4) Having looked at the map of where horses are allowed I find it very confusing so maybe instead clearer marked trails would help with the sharing of the beach environment. I realize there are probably some who through ignorance ride in the wrong place and there is always a few who are a law unto themselves but to bar all horse riders based on the actions of a few seems excessive.
		450	Fleming, Katie	To banish horses based on the reasoning of not following the rules is extremely unfair - put some correct signs up, make the rules very clear and there will be no problems with horse riders using the beach!
		455	Julie Anne Malcolm	That clear signs be erected to indicate sensitive ecological or historical sites that must be avoided by riders. That clear signs be erected to notify horse riders where they can and can't ride or lead a horse and that ALL droppings and waste hay must be collected and taken home.
		456	Tamar Terry	I feel as though the current signposting of the area in which we are allowed to ride at Tuapiro needs to be hugely improved also, as I find it very difficult to understand. Some areas it seems to outline are not actually accessible in some cases, so this has led to confusion as to where and how to get around the point. Hence, this could easily lead to a rider taking a horse back or being confused about how to get through and back to the entrance. Also, clear signposting and any other requirements of us I feel could be better signposted as well.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		457	Nicky Utting	I would like to see horses allowed full access to Taupiro Point, working with local iwi and council to ensure manure is picked up by all riders and that areas of cultural significance are well signposted, so that we are well aware of areas that are sacred or need to be avoided.
		460	Angela ODonnell	Better signage for permitted areas to ride. Fines for those who don't take away their waste. Signs to ensure horse riders respect cultural significance
		463	Anica Raitak	Clear signage showing where we can ride without disrupting anything with cultural significance.
		464	Greg Brown	Better signage and clearer direction on Equestrian use.
		470	Gene Jacobson	Better signage that clearly states areas allowed Culturally sensitive areas identified and registered for all to respect Beach access for all
		476	Bostock, Emma Louise	Clear guidelines for where not to ride i.e. only protected forest areas etc.
		487	Mcgurk, Neil John	All that is required is clearly defined boundaries for riders - when and exactly where they are allowed to ride.
		490	Denize, Genevieve	The current signage is unclear, causing confusion to riders as to the permitted areas
		491	Wright, Alan David	Clear signage for non-riding areas / kaimoana beds / areas of significance, so all parties can enjoy a place of New Zealand.
		501	Rogers, Peter Wayne	Install horse trail markers and horse poo disposal points/ bin like the dogs have at some points around the Bay Of Plenty.
		503	Rogers, Alayna	The inadequate and substandard signage meant that riders did not know where they are allowed to ride and where they are not, this lack of knowledge resulted in riders riding outside of the permitted areas.
		503	Rogers, Alayna	There has been no indication or signage as to where the kaimoana beds are at Tuapiro and therefore the riders and public who also use the area are unaware of these kaimoana beds are, if these areas were signposted I would expect that people would not intrude on these areas.
		503	Rogers, Alayna	The signage at Tuapiro needs to be improved. A clear and detailed sign showing the areas where the cultural areas of significance are located, where the kaimoana beds are and where horses are permitted to be ridden. A map of these areas at the boat ramp and car park would mean that all horse riders and pedestrians would read the signs, not only would the riders know where they are permitted to ride, they would also be educated as to where the kaimoana beds were situated so they would not ride over these areas which are "significant to Maori", this would also allow other people in the community to collect the Titoki and other kaimoana.
		506	Pooley, Lara	Many riders do not realise they are riding outside permitted areas, thus improved signage will help to resolve this issue and help keep horses out of the kaimoana beds.
		507	Ormsby, Julia	Clear, sign posted, designated areas for horse riders!
		509	Free, Diane Jean	Signage has not been clear. The map down at the boat ramp shows dotted lines around Tuapiro point and crossing at the carpark to form a circle. Horse riders have thought that this meant we could ride anywhere around the point as long as it wasn't through the trees, except for crossing over at the carpark.
		509	Free, Diane Jean	Solution: better signage would be an easy way to rectify this problem.
		509	Free, Diane Jean	Work on the bigger issues that are contaminating the harbour.
		512	Mead, Damon	I would also like some greater signage and information with regard to which areas need to be protected, so all user groups can safely and sustainably use these areas.
		516	Hanley, Max	I think they should more signage to ride etc and remove the geese and swans.
		519	Hanley, Mikayla	I would like signs where we can and can't ride our horses, to remind people to pick up there pony poo and take it away.
		520	Zajac-Wiggett, Piers	Signage educating all visitors at Tuapiro about the cultural history Signage on rules & specified areas
		522	Heibner, Philip Norman	Negotiate with local Iwi and riding groups to erect adequate signage that clearly identifies sensitive areas and acknowledges the special relationship the Iwi have with the area
		523	Sharfe, Bethany	Adequate signage will be installed at Tuapiro to clearly identify sensitive areas
		529	Evans, Erica	Council will clarify signs and install more near points of concern so restrictions can be observed.
		532	Mercer, Janice	Increase signage and provide designated times for horses.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		537	Sharfe, Paul Damian	The Council will negotiate with local Iwi and provide clear signage so that horse riders can respect the areas of cultural significance and work with Iwi to share the Tuapiro Point area which is special to both the Iwi and the recreational riders.
		540	Jones, Lloyd William	The Council should be able to solve any issues involved in keeping the Tuapiro Point area available for all recreational users including horse riders and dog walkers through negotiation and better signage.
		542	Walford, R and Meek, SS	Better signage, signage showing where cultural areas of significance are located, fence off areas
		544	Bryant, Daisy	Make a very big sign with clear guidelines of where we can ride
		550	Burgess, Daisy	Make a big sign with clear guidelines of where we can ride
		559	Merrin, Marian Irene	A willingness to cooperate with better managing the asset and pleas for clearer signage and direction as to what is required for better compliance have met with little positive outcome.
		568	Symes, Kirsten	If there are particular areas of cultural significance on Tuapiro Point there needs to be adequately signed and protected (possibly fenced). Horse riders are largely a responsible group and have made every effort to ensure they remain within the designated area at Tuapiro. Unfortunately the current signage is highly ambiguous and subject to different interpretation. To my knowledge there is no independent research which suggests horse manure is a significant environmental concern or poses any risk to human health
		570	Symes, Charles Wymond	Better signage to demonstrate requirements of recreational users of Tuapiro Point e.g. where each recreational user can and cannot go, what is required of the to avoid significant sites/areas of cultural and or ecological sensitivity, how they clean up after themselves
		573	Dawson, Allan Donald	As a casual rider along the beach I am embarrassed and distressed that I may have inadvertently "caused damage" or ridden in the "wrong place" or "sensitive place"! Surely these problems could be remedied by the Council providing a comprehensive explanation and better signage. The Council have a responsibility to do this. We all wish ecological and environmental aspects of our beaches to be protected. I venture to point out that the eutrophication of our harbour is a significantly more important problem than any possible damage from recreational horse riders!
		580	Heibner, Bernadette Madeline	Council will consult with local Iwis to install signage that celebrates the special native of the area and the Iwi's particular connection with it
		584	Tate, Merryn Ellen	That concerns from those opposed be carefully evaluated and where possible clear signage be erected that will let horse riders know where they can ride.
		597	Faber, Emma	If the signage sets out the rules clearly riders will follow them
		602	Willetts, Lisa Heather	Making the rules and areas to ride more obvious would help.
		607	Balneaves, Lisa	Council should make horse riders aware through signs on the beach.
		608	Stadler, Angelika	Horse riders would stay within permitted areas if the signage was improved.
		610	Hume, Deborah Margaret	The signage down there is confusing and limiting obviously no thought has gone into it.
		611	Waihi Beach Veterinary	Good signage for horse riders. Rubbish bins/compost bins for horse poo
		613	Burns, Joanne Maree	Improve the signage.
		619	Katikati Hack & Hunters Adult Riding Club	We ask that we work together to come to a solution that is agreeable to all. Horse riders have been badly let down by the signage at Tuapiro. Clear signs marking where kaimoana beds are located and where riders are allowed and not allowed are key to making sure all parties are informed and key areas are respected.
	2: Education	18	Birkett, Bev	Include a responsible horse rider who in turn can guide and educate
		23	Latham, Susan	Heard a very good suggestion about Council developing an application for smart phones that would inform riders as they approach areas of cultural significance and educates as to where to go. What a brilliant idea!
		31	Katikati Hack & Hunters	Suitable education and signage and regular liaison with clubs to keep users informed. Specific education around Kaimoana and birdlife in the area with information boards provided. Possibly buoys around kaimoana beach.
		31	Katikati Hack & Hunters	Most horse owners are responsible, sensible and intelligent people who for a large part are major players and contributors to the community
		34	Goodwin, David John	Reserves Bylaw should make it clear what responsibilities fall on horse riders and they should be educated on what is required of them - signs, written communication, etc.
		95	Vasenko, Maria	In my opinion, all we need is some very clear rules and boundaries. I'm sure all of the equestrian community would be very obliging if it meant we get to keep riding on the beach.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		107	Oliver, Joy	I'm sure that with more dialogue between the different groups we can learn to share this lovely outdoor area with all people
		154	Ainsley Vickers	I do, however, understand the concerns of the local iwi and other people who use this special place. Perhaps public education (such as newspaper articles?) about the negative effects of disobeying the rules, and the importance of preserving the ecosystems, could help. I would like to see signage and public resources, such as flyers or newspaper articles, educating riders on the reasons for the limited areas where they are allowed to ride and encouraging them to obey these restrictions.
		159	Rebecca Tasker	I suggest a "probation period" of sorts. Improved communication with riders as to the expectations for restricted riding areas, manure, etc, and then a one or two year period (for example) in which activity can be monitored. This whole thing has come out of the blue with no communication or attempts to enlighten the horse riding community at all.
		179	Bethany Bennie	On-going engagement with a representative for the horse riding community over the use of the site, including whether or not riders are keeping to the tracks, removing waste etc, may help the riding community take better care of the site and prevent on-going damage.
		185	Bella Taylor	In saying that there is a significant lack of information out there on how to ride on public spaces (excluding Tect park)- most of what I know, eg about not putting horse poo under the tree at Tuapiro, comes from what other people have told me. I do think that better information provision for users of public spaces could improve the experiences for all users.
		193	Sutherland, Caroline	Horse riders are responsible people. The focus should be on irresponsible people.
		194	Mitchell, Nadeen	Encourage cooperation between Tuapiro users. Horse riders have no wish to limit others' enjoyment of the beach. We are very happy to share.
		223	Sue Wickman	I would like to see the beach access remain fully available for horse use except for special areas such as surf patrolled busy beaches or where high numbers of people congregate over summer, or such areas as where birds are nesting. Local education of usage is important. Recreational horse riding must be protected for participation of many.
		283	Leigh Rowbotham	I would like clear outlines on permitted riding areas, and as I am keen to work towards some sort of compromise that will enable us, and everyone, to continue to use Tuapiro in a way that is acceptable to Iwi, some guidelines as what is expected of us as users as I'm sure we will be happy to stick to these guidelines moving forward.
		312	Richardson, Sheryl	Show the kaimoana bed locations
		319	Bateman, David James	If there are slight changes to be made to help protect the foreshore then it is a good idea to have this consultation period as riders would be more than keen to help, so please do not stop horses from riding down Tuapiro Point and hopefully the beach is enjoyed by all for generations to come.
		334	Lyn de Graag	Perhaps be clear on expectations and safe places to ride.
		357	Catherine Meech	People should be still allowed to ride on the beach. But there need to be better communication to assist people to respect each others use of the area. Obviously, no one wants to ride through an urupa. Burial areas need to be clearly sign posted. The cultural history of the area needs to be communicated via signage. Council or Doc can empower people who use the beach to enforce the requirement to pickup all waste (human and horse); and stay within designated areas. The Rangers can report people to the council by photos of them and their license plate. If there are certain times of the year where the beach is crowded then the times horses can ridden on the beach can be mandated ie at the height of summer before 10am and after 5pm..
		362	Cary Young	Horse riders that I know are aware of minimising damage to the area. Rather than restricting, educating the riders on what is environmentally and culturally important would work towards solving the issues.
		386	Hannah O'Brien	No banning of horse access. Any changes needed to ensure respect for the land while still allowing ALL of our tangata to enjoy the whenua.
		395	Lizette Turnbull	Working together in with the principles of Kotahitanga - coming together to find and agree on permitted riding area, there is confusion about current areas. Better signage, maps and signage showing where cultural areas of significance are.
		396	Julia Abrahams	Monthly clean up if needed if this is the issue.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		403	Michelle Hamilton	I would prefer that efforts were made to educate riders as to where and when they are allowed access to the Tuapiro area so that access is fair for all community users. The use of Tuapiro should be for ALL the community we can all enjoy this area whilst having respect for each other and for the cultural and otherwise significant areas we frequent.
		420	Kate johnson	I would like to see riding horses remain at tuapiro and more awareness of all tapu land so both can be treated with respect . . Both are integral parts of our history
		450	Fleming, Katie	In order for people to understand this, the history of this area needs to be shared, no one can undo what has been done in an inclusive, positive way. This area is used by locals as well as a lot of freedom campers - it would be great to see a sign erected that explains the history of Tuapiro and the cultural significance, the way a wider group will become aware and educated.
		488	Brass, Wiki	So how can us horse people get it right if we don't know what the game plan is?
		520	Zajac-Wiggett, Piers	I believe that both can co-exist with the proper management of traffic through the area, being careful preserve areas of cultural significance. This way general public, horse and riders can continue to enjoy Tuapiro's beauty and its cultural history.
		530	Zajac-Wiggett, Michele	And for there to be made: monuments, sculptured "Paus" by local carvers, ceremonies, commemorating events - that share understanding and honour the natural history of this beautiful place. - Signs for tourists to read too.
	3: Restrictions	1	Van Berlo, Maxine Beryl	If they do not want riders going through the trees, the simple answer is to close the trees to all and fence off the whole area or fence off the surrounding area.
		3	Hoseason, Maryanne	Some changes to riding area and rules put in place to prevent damage to and some sea life and push. This would still allow riding on the beach above the high tide line.
		5	Bongard, Shirley Ann	1. Protect the burial area from horses and dogs byt allow pedestrians. 2. Allow horses on the sand area with one or two points of entry from the frass reserve to the beach.
		7	Besley, Samantha	Put a fence up to prevent riders from cutting through the forest
		7	Besley, Samantha	Allow riding in the 'arena' as I have bever seen people walk through it and riders would love to be able to ride it as some have no where else to ride.
		8	Besley, Amanda Wendy	Allowing riding in the channel at mid-tide - essential for health of horse
		8	Besley, Amanda Wendy	Restrictions on commercial use by large groups (if that happens)
		8	Besley, Amanda Wendy	Possible seasonal restrictions
		8	Besley, Amanda Wendy	Remove the track through the marshes - too soft anyway
		17	Van Zweeden, Johanna	Finally, I would add that I see no problem in enforcing more strict rules with waste and which areas, ie the grass area, that are not for riding on.
		21	Hayward, H	Horse riders continuing to use the reserves as and when they wish with the restrictions of course on the busiest times of the year.
		27	Brendan Barraclough	If people are still riding where the shouldn't. Ie the pines I say we need to put a fence up right around the pines and or and places they shouldn't be. And more signage I think.
		31	Katikati Hack & Hunters	With closure of Te Puna and Athenree beach it follows usage will be heavier at Tuapiro. Not everyone wants to ride on a muddy, rocky, steep trail in a remote area Lund Road, TECT park)
		33	Mclean, Fay Maree	Perhaps other factors to protect the kaimoana could be considered. Possibly Tuapiro could be open to riders and horses 2 weekends a month clearly stated on signage.
		46	Hayley Akenehi Murray	If the horses are damaging the sea bed maybe a proposed change could be made that only riders that get a "special pass" through council can ride there? Maybe limits the rides per rider each week or month? I think there needs to be more signage that clearly shows horse allocation.
		49	Raewyn ann ohara	Allowing horse riding at Tuapiro point with stricter rules on where horses are not allowed. Most of us do respect these rules when put in place.
		53	Carolynn WEST	Signs identifying the shellfish beds that are to be avoided and that all manure must be taken with rider. Impose fines for those that dont obey the signs.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		59	Bron Edwards	Make the signage for riders more visible/ current signs are too far away from where people park. first timers etc may not see them. clean up the fallen trees at the pines .. they are a hazard to any beach user (everyone, not just horse riders) fence the sacred area ... not just horses in there - do the iwi want people and dogs tramping through there with no respect?? if the residents want, create a compost box for poos, i always take all of mine away (have a bucket and a cupboard in the truck dedicated to it no matter where i go) but maybe the residence would like a free compost waste area the community can share?
		62	Peter Nicholas	If the changes proceed then some concession should be made for horse riders to visit the Point i.e. organised events should still be allowed to take place.
		63	Jillian Mary Kerkhof	Restrict horses from the areas of kaimoana and culture Provide bins for horse poo so gardeners can use it Put up clear signs for users Consequences for abuse of the privilege
		78	Diana Donker	Tuapiro Reserve should stay open for horseriding at the designated areas under the current bylaw, however a PERMIT SYSTEM could be introduced to: - control the numbers of riders allowed at Tuapiro Reserve - control when and what time horse riders are allowed to use Tuapiro Reserve - close off areas at certain times of the year (e.g. to protect migrating or nesting birds) A permit system like this has proven to work successfully in countries like the USA.
		87	Georgina Lloyd	Perhaps also beach riding may be restricted somewhat -perhaps on a licence/user pays basis. That way use may be limited somewhat and there would be a degree of regulation and accountability.
		94	Kite, Andrea Louise	As you go around the point, allow horses to swim - but maybe make a rule - that if there are people swimming there - the horses can be no closer than 100 metres from swimmers (other councils have this rule). The included map is a suggestion - the red is banned from horse riders - and my understanding from the Katikati open day - that is where their shellfish is - near the low tide mark. If a big group - say 20 plus want to use the beach, maybe get them to apply for a permit over summer - can be like fire permits - cost nothing - then the council is aware when big groups of riders are using the beach over its busiest time. Adopt Tauranga City Council's approach by allowing horses/dogs at all beaches apart from the busy beaches for eg TGA city bans horses/dogs from the likes of Mt Maunganui and Pilot bay.
		98	Hickmore, Danielle	Dont stop horses from our beaches impose a fine if there manure is collected after there road similar to the dog poop fine. That alone will ensure each rider collects there waste. Its not always possible to do it during a ride for obvious reasons but ensuring they do not leave without collecting it.
		110	Van Berlo, Leonardus Johannes Franciscus	I suggest closing Tuapiro Beach over the busy 6 week holiday period as you do for Waihi Beach
		119	Estelle Leyshon	Have you considered other options for access but under more controlled conditions i.e a permit basis so people can be held accountable if necessary.
		122	Bert van der Lee	On the harbour side are some good natural arenas where there is no kai Moana, at least allow riding there and close to the foreshore.
		123	Tut Baldock	Give horse riders a section of the point that they are allowed to ride. Provide waste disposal units. Provide areas to tie up horses. Keep the trees and scrubs maintained to minimize damage.
		142	WILSON JAMES ORANGE	Allow community access to coastal areas for everyone, but that walking dogs should be on a leash at all times. (My wife needed medical treatment after being knocked down by a large running dog on Waihi Beach this last Summer period, when dogs were allowed to be unleashed - also to protect visiting seasonal fowl in our estaries.)
		143	Sophie E Hardy	I would like to see horses able to enjoy the whole beach and not just the high tide line plus they should be allowed to swim. However they should be kept off the wooded area if that is a burial site and better signage should be put up making this clear and the actual burial site should be fenced off.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		145	Amy Dennett	We are wanting to come to a solution and are happy to work with all parties involved so we can all enjoy this wonderful place together. We need proper, clear signage of where we can and cannot ride. Most of us had no idea that there were certain areas out of bounds because there is simply no proper guidelines or information. I know the majority of us pick up our horses manure and take it home with us. (It is an organic material, great for the garden). Perhaps a manure bin could be provided. There are many ways we can all make this work. Please do not take our little piece of paradise away. Thanks you for listening.
		155	Anton Brett Turnwald	this be roped off or picket fence to stop, motorbikes, horses and large dogs from using the point in question.
		156	Andrew Hollis	I'd like to add a clause in the bylaw to ask for permits to be issued for large groups of riders 20 or more horses to be require permits.
		158	Anton Leo Turnwald	also with were the horses are able to go the council could think about making a 30-35 meter line from the shore line and that is were we are able to ride.
		160	Pauline Silvester	The rules need to be made a little clearer and if in fact there are kaimoana at the tip of the Point- have that area cordoned off and allow horses to travel through the trees to arrive at the far side by the channel. If there are bones somewhere have them blessed and also fenced off so they can be honoured.
		163	Jacqueline May Barrow	One of the riders said that they are tightly restricted and can't go out into the water. I think that this is a shame and that they should be allowed to run wider into the water if they wish. Tighter observations should be made on the families that break through the wooden posts and set up messy camps on the point itself. They leave a lot of rubbish behind and cause damage to the plants that can take weeks to grow out.
		167	Gary Allwood	Engage with all parties to find areas where horses are able to go and where they should absolutely not be allowed to go. Update the current ambiguous signage and educate the equestrian community. Allow individuals to ride but limit organised group events to 2 times per annum. Undertake a review of all activities at Tuapiro including Camper-vanning, waka ama events, boat launching by tractors, jet skiing, yachting, kite surfing, fishing, motorbikes. Engage the Regional council to undertake a long term 5 year study of the effects of these groups on the area and develop a specific Management plan for this area that enables Tuapiro to be used by all.
		188	Bay Of Plenty Regional Council	Support the inclusion of rules to manage horse riding or horse leading
		194	Mitchell, Nadeen	Keep horses below the high tide mark so that manure washes away. Again, if there is no proven risk to shellfish or if then it is unreasonable to ask riders to pick it up.
		198	Martin, Paul	The banning is wrong and will always be wrong in my thinking and my whanau's eyes, reducing the number of horse riders is fine. And revisiting the issues in three years, followed up by a cultural impact report gives the 700 people that have come out of the area a chance to take care of the Taonga we all love Tuapiro Point given these people the right to self monitor from here on, will show council that people can take care of Maori sites with real history.
		206	Wallace, Robert Lance	From clear signage to even allocated parking during peak seasons can form for all involved. Seeing as there is in fact no scientific proof that horses are damaging kaimoana beds and this Bylaw Review is not required at this point in time it is a very reasonable request to keep this beach open to horses and their riders of all ages.
		215	Maria King	Banning or restricting driving on the beach , motor bikes and /or dogs running unattended at people who are on the beach would be a far better use of resource management.
		222	Rebecca Marie Lillian O'Byrne	I would like horses to continue to be allowed at tuapiro point but if we could find a compromise between the two opposing groups would be wonderful. If that does mean closing the beach to horses it would only be fair to give us another costal area were we can still enjoy this special place.
		231	sarah rice	2. A permitting system be introduced for large groups. (Over 20 horses) Groups such as Pony club, Adult riding groups etc can apply for a permit to ride on a greatly increased selection of beaches. With this permit, comes written rules and routes that must be adhered to. 3. Consider a permitting system for individuals. WBOP and Tauranga residents should be allowed to get a permit to ride on all beaches. Permits should come with full instructions, rules and regulations so that all horse riders are educated and have no excuses for bad behaviour. People from other regions such as Waikato should be able to apply for a day pass.
		235	Jenny Louise Hayward	Allowing horses to continue to be ridden Tuapiro Point but with more compliance monitoring to ensure this can be sustainable.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		240	Katherine Jane Sieling	Surely if there is an area that is sensitive, it could be fenced off, either temporarily or permanently, as we do in Whitianga, to keep dogs, people and horses away from the Dotteral nests.
		241	Emily Trask	I would like to see that horse owners be allowed full access to the beach and surrounding areas, and be able to swim with their horses and ride along the beach. Greerton Pony Club would be happy to accept some proposed regulations such as always removing horse manure and not leaving litter, and we as a club would treat the beach with utmost respect. Members of the public would always have right of way, and our club would agree to be responsible for keeping our riders in line
		245	Darinee Turnwald	The council to make it 30 metres out from the shore line for riders.
		252	Jo Schimanski	I am in favour of making some amendments to consider the cultural needs of others. I believe that we can accommodate all groups. I propose that a trail could be considered away from old burial sites, and a map that clearly identifies where riders can go at the entrance of Tuapiro (ie do not access the forest trails). As for kaimoana beds, maps could show some areas where riders could ride, and areas they can't that see the growth of the kaimoana beds that are said to be not growing due to the hoofprints of the horses.
		258	Jeanette Barbara McQuarters	I would like to see the horse access allowed in the 2012 Bylaw being enforced in some way (cameras?) rather than access being completely denied. It would be a shame if the actions of a few disrespectful riders spoil this facility for all others.
		265	Helen Davenport	If changes are to be made to the Draft Law I would like to see better sign posts at Tuapiro to show clearly where horses are allowed, hopefully along the beach below the high tide mark allowing the horses to be swum in the sea, something all generations and the horses love. Also for us to be allowed to ride the horses on the large sandy inlet areas at the top end of Tuapiro, a lovely flat area for the children to school their ponies safely. I would like to see signs informing us of the cultural significance of the area so that we can all understand why there are areas not to be ridden on. If horse poo is a problem, better signs telling people to clear up (which I believe most of us do already). If large groups of horses at one time are a problem maybe a system could be put in place where they have to apply to the council for a permit, perhaps a small fee could be charged that would go towards funding the signs. Covered poo bins could be put in a discreet place to be used by horse riders, locals could use this for their gardens or the money raised from permits used to fund emptying them and the council could use it for fertilising their parks rather than using chemicals saving the council money in the long run as well!!
		312	Richardson, Sheryl	severe regulations for rubbish/plastic etc
		329	Hannah Love-Trowell	But perhaps protect the cultural concerns involved with other riders riding where they shouldn't be
		350	nicky rozier	I agree that we all need to work together to ensure this beautiful environment remains this way. There should be strict rules which help to protect everyone's best interests. I feel we should all compromise to achieve this goal so all parties can continue to enjoy the beach.
		353	Robert Andrew Davenport	Perhaps fence off the burial area and put up an information station regarding its history. The information as to where you can ride is presently extreamy poor and uninformative.
		369	Duncan Sharpe France	Refinement of indications where horses may be exercised (see my attachment)
		377	Warren Grant	1. Make more sealed car parks down near the toilets for Maori to park in (horses always park up the far end on the grass strip). 2. Provide clear signage of where horses can and cannot go. 3. Provide a manure bin near the boat ramp (I believe this is done at the Redwoods) and I am sure the locals would love the free fertilizer for their gardens (yes horse poo can be used to grow food! It does not contaminate it). 4. Ask Maori to fence off and place signage in the forest area - this would be great for everyone, as they could read about the local history of the place and dog walkers, campers and others could all be informed of the dos and donts.
		402	Jayne Donker	I think that it would be a good idea to restrict horse riding from some parts of the beach where it is special to the local iwi but not completely banning them from the beach. There could be rubbish bins set in 5 different places around the beach to put the manure into.
		404	Bert Donker	I can understand that high number of horses can be a nuisance to some. It might be an idea to introduce a permit system that only allows a limited number of horses on the beach per day. Permit systems like these have proven to be successful in several countries. Like on Waihi Beach, horses could be excluded for the beach at some periods of the year, re. not during daytime during the Summer Holidays.

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		423	Katherine Bell	Penalties for not following rules at turapiro.
		440	Lisa Coulson	I believe the status quo should remain with regard to horses continuing to be allowed on the beach as per the 2012 bylaw, with some changes to the permitted area to make it more practical for riders. • I believe the riders should be required to apply for permits; and at the time the permits are handed out they get provided with a handbook outlining the rules; and other important factors about the area including the cultural and spiritual significance of the area.
		444	Sally Jane Goodyear	Perhaps we could adopt a system similar to that of Auckland Council. Auckland Council allows recreational horse riding on 8 regional parks (including some beaches) and require riders to have a network horse riding pass. The purpose of this pass is to ensure that there is good two way communication between council staff and horse riders; that rider details are known in the event of an emergency, to provide up to date information on temporary closures or changes to access codes and to promote any new riding opportunities. The pass is free. Riders are expected to carry the pass while riding on Regional Parks. They also have a Regional Parks Horse Riding Code of Conduct.
		445	MICHELLE RAITAK	Lets work together, if there is an area that is being replenished for Kaimoana, then lets work on grid / zoning system and periodically restrict access to this area while the replenishment is taking place, just like we protect our dotterel community on beaches.
		449	Megan J Richards	1) Council is suppose to cater for the whole community which includes horse riders, beaches are great open spaces with no fences and no cars and if more beaches where opened up riders numbers could spread out across the bay riding on beaches close to their grazing
		455	Julie Anne Malcolm	Horse riders should be mindful of other beach users (as should other beach users of horse riders) and keep to a walk when within 20m of other non-riding beach users.
		490	Denize, Genevieve	There are alternatives to manage horse movements such as controlled access, permits and new signage.
		490	Denize, Genevieve	I strongly oppose the proposed bylaw change and consider that if the WBOP proceeds to implement the bylaw as proposed, it will be subject to successful legal challenge. As such, I urge the councillors not to vote for implementation of this proposed bylaw. It is flawed and there are other mechanisms by which any concerns can be better addressed.
		496	Warwick, Bruce and Marian	There are many sacred or historic sites throughout New Zealand which have simply been fenced off to preserve the site. Would this not be a solution mutually fulfilling everyone's requirements?
		520	Zajac-Wiggett, Piers	areas for the public, horses & riders & dogs area set a side to preserve significant cultural site
		522	Heibner, Philip Norman	Council will work with extended riding time at Waihi Beach to include riding before 10am and after 7pm during the period when it is currently disallowed
		532	Mercer, Janice	Perhaps introduce permit system for horse riders that allows for responsible owners to continue access to the beach.
		533	Gallon, Brad	Fencing of culturally important sites would be a good start so no damage would be done to them.
		534	Jones, Miriam Louise	The reserve and beach area of Tuaprio Point will be accessible to horse riders but they must remain within the area designated and remove any manure before leaving.
		542	Walford, R and Meek, SS	Permitted riding areas - maybe attach a map showing where you feel the permitted riding area is and why
		568	Symes, Kirsten	If there is a concern regarding kaimoana beds in the southwestern area (at the base of the point) a simple compromise may be made by the horses being restricted to the northern most end of the western side of the point. A possible compromise which would still allow horses adequate space would be to include the first inlet along from the tip of the point on the western side and restrict access beyond this. I feel comfortable riding with my two young children at Tuapiro but would not consider taking them into TECT Park for several reasons including the distance (and cost) to travel, the lack of cellphone reception, low visibility, possibility of getting misplaced and limited accessibility for accompanying walkers. The proposed reserve adjacent to Lund Rd will be suitable for advanced horse and rider combinations but is steep and twisting in places and tracks are clay based so it will be slippery in all but the driest of weather. Farms and orchards are increasingly unavailable for horse riding due to the new Health and Safety laws which are putting many managers off allowing us access. Riding on roads is dangerous. Horses form part of that culture and tradition of this country and it would be sad to see horses lost from our public spaces.
		578	Molloy, Morgan Ann	Could there be some kind of compromise? A area where riding is allowed, and a fine for ruining the beds?
		579	Fuller, Sarah Helen	Restrict riding times to mornings to avoid clashes with children swimming in summer, notices to horse owners to avoid riding on beach at busy times.
		580	Heibner, Bernadette	Council will install markers immediately adjacent to sensitive areas so the restricted areas are obvious to all

Summary Report for the Reserves and Facilities Bylaw 2018

Topic	Issue	Sub ID	Name	Summary
		619	Katikati Hack & Hunters Adult Riding Club	Auckland Council allows recreational horse riding on regional parks and require riders to have a network horse riding pass. The pass ensures there is good two way communication between council and horse riders and is free. There is also a Regional Parks Horse Riding Code of Conduct.
	4: Horse waste	3	Hoseason, Maryanne	And making riders responsible for horse fouling in any of this space (much like dogs)
		6	Besley, Peter Andrew	Horse poo should be picked up and taken away.
		8	Besley, Amanda Wendy	- No riding at full tide. - Fines for non removal of faeces on Kaimoana beds that are used
		22	Richardson, Veronica	Poo bins could be helpful and I walways respected the signs which stated no riding in the pines
		31	Katikati Hack & Hunters	Signage has been inadequate and misleading. People don't deliberately go in the wrong place, they think that is what has been indicated.
		34	Goodwin, David John	The most contentious issue is horse poo - the Bylaw must be specific on what horse riders need to do regarding horse poo clean up and removal.
		73	Anne McNabb	Encourage people to look after the environment by picking up their horse poo and disposing of it properly, and encourage responsibility for all beach users because this is somewhere to share not exclude.
		77	Janna Everdien de Graaf	If you are so worried about the manure why don't you make a big rubbish bin. Why don't you make a big compost down which which people pick of the horse manure? Maybe a local bin which is only for horse manure and someone daily picks it up?
		156	Andrew Hollis	The wording of the horse manure rule ought to read, "You must remove any horse manure and dispose of it in a hygienic manner provided that such removal can be conducted reasonably and safely". The removal of various location specific rules will make this rule easier to administer and monitor for the council saving money. Importantly it will also prevent non-compliance through ignorance of individual rules.
		157	Alastair Rutherford / North Loburn Equestrian Center	The Council should be working with the horse riding community to develop a management plan that does not compromise the long-standing interests and use of the area for horse riding. Nor should the Council impose unrealistic and unachievable requirements for the removal of horse waste - which is an organic and completely biodegradable material and does not pose serious risks to human or other animal health.
		159	Rebecca Tasker	If manure left behind is an issue then guidance can be given to riders as to how to deal with this. E.g. the expectation is that you dismount and remove any manure, regardless of location. This can either be removed entirely, or left in designated spots as compost piles.
		176	KIM CAWTE	HORSE MANURE CAN BE EASILY REMOVED AND IS 3/4 WATER BASED AND NOT DETRIMENTAL TO THE ENVIRONMENT, SO THIS SHOULD NOT BE AN ISSUE.
		197	Lyon, Rebecca Louise	Having rules for picking to horse poo is sensible but banning for impacts on shellfish beds seems to be a reach when in others areas vehicles can drive on the beach. If horses go, then all vehicles need to go too.
		208	Cobb, Hannah Zillah	WBDC could provide manure disposal sites and horses that do defecate below the high tide line should not have to pick up as it is so very quickly diluted and washed away with the tide
		210	Katrena Ritchie	The requirement to remove horse manure on the beach due to practicality reasons - as this is a natural non bio hazard and as yet no proof has been provided of any impact. Poo bins provided for clean up in parking and grass areas
		215	Maria King	I am ok with their being a by law enforcing horse riders to clean up their horses poo (even if they have to dig a hole and bury it) but to ban them altogether is very unfair when horses and their riders actually have minimal if any impact on the environment or other users.
		228	Sheree smith	Allow horses in certain areAs including dogs, but must clean up mess.
		231	sarah rice	5. Trial introducing Horse Poo bins at appropriate places. Bins should come with instructions for members of the public telling them that it can be taken for use as garden fertiliser and for adding to home compost bins. (Horse owners frequently sell horse poo in bags at their gate for this purpose) There will need to be VERY clear instructions to dog owners that dog poo must not be disposed of in these bins as dog poo would make them a health hazard. There is risk of plastic contamination too as people dump poo that has been bagged but I think a trial at a few sites that are also accessible to people who want to collect and use as an organic fertiliser would be worthwhile.
