2.2 Reasons

2.2.1 The submission point is in support of the Plan Change.

2.2.2 The landscape values in these areas have been compromised. These areas are highly unlikely to hold any of the qualities identified for assessment in Policy 15 (c) of the New Zealand Coastal Policy Statement. The risk of creating a precedent is low because these are the only areas within the District identified as being developed residential zones subject to landscape feature overlays. The other residential zones in the District which have landscape overlays are the Omokoroa Golf Course and Council reserve at Pukehina Spit End.

2.2.3 This removes the requirement for landowners to apply for resource consent for new houses and additions in “developed” residential zones where the adverse effects are already apparent and hence removes unnecessary process and costs for landowners and Council.

2.2.4 By not removing landscape features from all residential zones, it retains landscape controls in “undeveloped” residential zones.
which are still vulnerable to being affected by future development. This includes part of S10 (Bowentown Heads) and the entirety of the S22 (Pukehina Spit End) and S23 (Western Bay Golf Links).

2.2.5 This is fully consistent with the exclusion of Rural-Residential Zones from all landscape features and Residential Zones from the Tauranga Harbour and Wairoa River Landscape Management Areas which were excluded due to already being developed.
