You don't often get email from predatorfreewaihibeach@gmail.com. [Learn why this is important](#)

Kia ora Nanci,

Here is the email trail from Coast Care to me. The relevant email is this morning at 06.43 hours and mine outlining the address yesterday Sunday, August 10, 2025 4:43:29 PM.

Thanks

Pip

Hi Pip,

I have not received any direct contact from Mr and Mrs Bason regarding any dune restoration or plantings.

I hope this helps 😊

Kia ora Sheanna,

Thanks so much for getting back to me on a Sunday!

I have attached supplementary evidence from Alan Fraser - subject to my supplementary evidence of works carried out devastating the dune system out without permission at No.15 Glen Isla Place - photos attached.

Noting that it states at point -

21. Mr and Mrs Bason have been in contact with Coast Care and have already reestablished some of the native planting that was removed from their own land when the fence was installed, and they intend to carry out more planting on the dune by moving some established native dune plants from their own garden as well as buying some new plants.

And historically point -

24. The residents of Glen Isla Place, working together with the Council and Coast Care, planted numerous native dune plants on the dune after the dune enhancement was carried out in 2011. In particular, Mrs O'Sullivan and her late husband Mr Mike O'Sullivan at 12 Glen Isla Place, the Fraser family at 16 Glen Isla Place and Mr and Mrs Cory-Wright at 15 Glen Isla Place, have planted hundreds of dune plants, and fertilized and watered the southern end of the Glen Isla Place dune. The outcome of that planting can be seen in the healthy spinifex and pingao visible in Image 1.

I am not so concerned about point 24. historically, but with point 21. and contact since 5 April 2025 when the works were carried out on the property.

Thanks in advance

Pip
