

# Significant Accounting Policies Kaupapa here Tautuhi Tatauranga

This section includes financial statements and information. The Local Government Act 2002 requires Council to include forecast financial statements for the local authority within the Long Term Plan (LTP). The main purpose of providing prospective financial statements is to enable stakeholders (residents and ratepayers, other local authorities, business community groups and government regulatory bodies etc.) to make decisions regarding Council and how it conducts its business.

This prospective financial information includes the prospective Statement of Comprehensive Revenue and Expense, the Prospective Statement of Financial Position, the Prospective Statement of Changes in Equity, the Prospective Statement of Cash Flows, and the accompanying Prospective Statement of Accounting Policies and Notes to the Financial Statements. This information must be prepared according to generally accepted accounting practice (GAAP) and recognised accounting standards.

# **Prospective Statement of Comprehensive Revenue and Expense**

The Prospective Statement of Comprehensive Revenue and Expense shows all of Council's prospective revenue earned and expenses incurred for the years ended 30 June 2022 to 30 June 2031. Revenue includes revenue received from rates and other revenue such as investment revenue, rent and fees while expenses paid includes costs such as operating costs, interest payments and depreciation.

This Prospective Statement shows how total comprehensive revenue and expense is arrived at. Total comprehensive revenue and expense is then added or subtracted from Council's equity as shown in the Prospective Statement of Changes in Equity.

# **Prospective Statement of Changes in Equity**

This Prospective Statement provides information about the nature of changes in Council's equity for the years ended 30 June 2022 to 30 June 2031.

# **Prospective Statement of Financial Position**

The Prospective Statement of Financial Position shows the assets and liabilities of the Council as at 30 June each year from 2022 to 2031.

Assets include cash, accounts receivable (money owed to Council but not yet received), investments, land, buildings, operational and infrastructural assets. Current assets are amounts owed to Council that are expected to be received within the next 12 months while current liabilities are Council's debts that are due to be paid within the next 12 months. Investments are Council funds held in revenue earning securities while property, plant and equipment are of a permanent nature and are held for the benefit of the community.

Non-current liabilities represent money owed by Council that does not have to be paid within the next 12 months.

# **Prospective Statement of Cash Flows**

This Prospective Statement covers all the inflows and outflows of cash during the year covered by the Prospective Statement of Comprehensive Revenue and Expense. The Prospective Statement of Cash Flows identifies the sources and application of cash in respect of Council's operating, investing and financing activities.

# **Prospective Proposed Statement of Accounting Policies**

These explain the basis upon which the prospective financial Prospective Statements are prepared. They explain the methods adopted by Council used to measure the transactions incorporated into the financial Prospective Statements above.

# **Prospective Funding Impact Statement**

The Prospective Funding Impact Statements ("PFIS") have been prepared in accordance with the Local Government (Financial Reporting) Regulations 2011, which came into effect 11 July 2011. This is a reporting requirement unique to local government and the disclosures contained within and the presentation of these statements is not prepared in accordance with generally accepted accounting practices.

The purpose of these statements is to report the net cost of services for significant groups of activities ("GOA") of Council, and are represented by the revenue that can be attributed to these activities less the costs of providing the service. They contain all the funding sources for these activities and all the applications of this funding by these activities. The GOA PFIS includes internal transactions between activities such as internal overheads and charges applied and or recovered and internal borrowings.

The PFIS is also prepared at the whole of Council level summarising the transactions contained within the GOA PFIS, eliminating internal transactions, and adding in other transactions not reported in the GOA statements. These items include but are not limited to gain and/or losses on revaluation and vested assets.

They also depart from GAAP as funding sources are disclosed within the PFIS as being either for operational or capital purposes. Revenue such as subsidies received for capital projects, development contributions and proceeds from the sale of assets are recorded as capital funding sources. Under GAAP these are treated as revenue in the Prospective Statement of Comprehensive Revenue and Expense.

# **Proposed Statement of Accounting Policies for Prospective Financial Statements**

# **Reporting entity**

Western Bay of Plenty District Council (Western Bay Council) is a territorial local authority established under the Local Government Act 2002 (LGA) and is domiciled and operates in New Zealand. The relevant legislation governing Western Bay Council's operations includes the LGA and the Local Government (Rating) Act 2002.

Western Bay Council provides local infrastructure, local public services, and performs regulatory functions to the community. Western Bay Council does not operate to make a financial return.

Western Bay Council has designated itself and the group as public benefit entities (PBEs) for the purposes of complying with generally accepted accounting practice.

The prospective financial statements of Western Bay Council are for the 10 year period ending 30 June 2031. The financial statements of Western Bay Council for each year within the Long Term Plan are to be authorised for issue by Council. These prospective financial statements were authorised for issue by the Western Bay Council on the 29 June 2021.

# **Basis of preparation**

These set of prospective financial statements have been prepared in accordance with NZ generally accepted accounting practice (GAAP) and opening balances for the year ended 30 June 2021. Estimates have been restated accordingly if required. No actual financial results have been incorporated within the prospective financial statements.

Council and management of Western Bay of Plenty District Council accept responsibility for the preparation of the prospective financial statements, including the appropriateness of the assumptions underlying the prospective financial statements and other required disclosures.

Council, who are authorised to do so, believe the assumptions underlying the Prospective Financial Statements are appropriate and as such, have adopted the Consultation Document and have approved it for distribution on 18 February 2021.

The prospective financial statements have been prepared on the going concern basis, and the accounting policies have been applied consistently throughout.

# **Statement of compliance**

The prospective financial statements of Western Bay Council have been prepared in accordance with the requirements of the Local Government Act 2002 (LGA), which include the requirement to comply with generally accepted accounting practice in New Zealand

(NZ GAAP). The prospective financial statements of the Council have been prepared in accordance with the requirements of the LGA and the Local Government (Financial Reporting and Prudence) Regulations 2014 (LG(FRP) R), which include the requirement to comply with generally accepted accounting practice in New Zealand (NZ GAAP).

The prospective financial statements have been prepared in accordance with Tier 1 PBE accounting standards.

These prospective financial statements comply with PBE Standards.

#### **Measurement base**

The prospective financial statements have been prepared on an historical cost basis, except where modified by the revaluation of land and buildings, certain infrastructural assets, investment property, forestry assets and certain financial instruments (including derivative instruments).

# Presentation currency and rounding

The prospective financial statements are presented in New Zealand dollars and all values are rounded to the nearest thousand dollars (\$000).

# Critical accounting estimates and assumptions

In preparing these prospective financial statements, Council has made estimates and assumptions concerning the future, these are outlined in the Informing our Planning section from page 39. These estimates and assumptions may differ from the subsequent actual results. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations or future events that are believed to be reasonable under the circumstances.

# **Cautionary note**

The information in the prospective financial statements is uncertain and the preparation requires the exercise of judgement. Actual financial results achieved for the period covered are likely to vary from the information presented, and the variations may be material. Events and circumstances may not occur as expected or may not have been predicted or Council may subsequently take actions that differ from the proposed courses of action on which the prospective financial statements are based.

The information contained within these prospective financial statements may not be suitable for use in another capacity.

# Standards issued and not yet effective and not yet adopted

Standards, and amendments, issued but not yet effective that have not been early adopted, and which are relevant to Council are:

#### Financial instruments

In March 2019, the XRB issued PBE IPSAS 41 Financial Instruments. PBE IPSAS 41 replaces PBE IFRS 9 Financial Instruments. PBE IPSAS 41 is effective for the year ending 30 June 2023, with early application permitted. The main changes under PBE IPSAS 41 are:

- New financial asset classification requirements for determining whether an asset is measured at fair value or amortised cost.
- A new impairment model for financial assets based on expected losses, which may result in the earlier recognition of impairment losses.
- · Revised hedge accounting requirements to better reflect the management of risks.

Council plans to apply this standard in preparing its 30 June 2023 financial statements. The Council do not expect the impact of this standard to have a material effect on the financial forecasts.

# Service Performance Reporting

In November 2017, the XRB issued PBE FRS 48 Service Performance Reporting. PBE IPSAS 48 is effective for annual periods beginning on or after 1 January 2021, with early adoption permitted. Council plans to apply the new standard in preparing the 30 June 2022 financial statements. The Council do not expect the impact of this standard to have a material effect on the financial forecasts.

## **Cashflow Statements**

Disclosure Initiative (Amendments to IAS 7), issued by the IASB in January 2016, amended IAS 7 Statement of Cash flows to require entities to provide disclosures that enable users of financial statement to evaluate changes in liabilities arising from financial assets. The IPSASB subsequently amended IPSAS 2 Cash Flow Statements in Improvements to IPSAS, 2018 and the NZASB amended PBE IPSAS 2 in 2018 Omnibus Amendments to PBE Standards. The Council plans to apply the new standard in preparing the 30 June 2022 financial statements. Council do not expect the impact of this standard to have a material effect on the financial forecasts.

# Changes in accounting policies

There have been no other changes in accounting policy.

# Assumption underlying prospective financial information

The financial information contained within these policies and statements is prospective information and has been prepared in compliance with PBE FRS 42: Prospective Financial Information. The purpose for which it has been prepared is to enable the public to participate in the decision-making processes as to the services to be provided by Western Bay of Plenty District Council over the financial years from 2021/22 to 2030/31 and to provide a broad accountability mechanism of the Council to the community.

# Significant accounting policies

#### Associate entities

Council's entities associate investment is accounted for in the financial statements using the equity method. An associate is an entity over which Council has significant influence and that is neither a subsidiary nor an interest in a joint venture. Council has a 9.7% share in Bay of Plenty Local Authority Shared Services Limited (BOPLASS). The Council also has a 50% ownership in Western Bay of Plenty Tourism and Visitors' Trust.

The investment in an associate is initially recognised at cost and the carrying amount in the group financial statements is increased or decreased to recognise the group's share of the surplus or deficit of the associate after the date of acquisition. Distributions received from an associate reduce the carrying amount of the investment in the group financial statements.

If the share of deficits of an associate equals or exceeds its interest in the associate, the group discontinues recognising its share of further deficits. After the group's interest is reduced to zero, additional deficits are provided for, and a liability is recognised, only to the extent that Council has incurred legal or constructive obligations or made payments on behalf of the associate. If the associate subsequently reports surpluses, the group will resume recognising its share of those surpluses only after its share of the surpluses equals the share of deficits not recognised.

Where the group transacts with an associate, surpluses or deficits are eliminated to the extent of the group's interest in the associate.

#### Revenue

Revenue is measured at fair value.

#### Rates revenue

The following policies for rates have been applied:

- General rates, targeted rates (excluding water-by-meter), and uniform annual general
  charges are recognised at the start of the financial year to which the rates resolution relates.
  They are recognised at the amounts due. Western Bay Council considers that the effect of
  payment of rates by instalments is not sufficient to require discounting of rates receivables
  and subsequent recognition of interest revenue
- Rates arising from late payment penalties are recognised as revenue when rates become
  overdue
- Revenue from water-by-meter rates is recognised on an accrual basis based on usage.
   Unbilled usage, as a result of unread meters at year end, is accrued on an average usage basis
- Rates remissions are recognised as a reduction of rates revenue when Western Bay Council has received an application that satisfies its rates remission policy
- Rates collected on behalf of the Bay of Plenty Regional Council (BOPRC) are not recognised as revenue in the financial statements, as Western Bay Council is acting as an agent for the BOPRC.

## Financial contributions

The Resource Management Act 1991 is the governing legislation regarding the charging of financial contributions.

Financial contributions are recognised as revenue when Western Bay Council provides, or is able to provide, the service for which the contribution was charged. Otherwise, development and financial contributions are recognised as liabilities until such time as Western Bay Council provides, or is able to provide, the service.

# Waka Kotahi NZ Transport Agency roading subsidies

Council receives funding assistance from the Waka Kotahi which subsidises part of the costs of maintenance and capital expenditure on the local roading infrastructure. The subsidies are recognised as revenue upon entitlement, as conditions pertaining to eligible expenditure have been fulfilled.

## Significant Accounting Policies - Policies, Summaries and Statements

# Other grants received

Other grants are recognised as revenue when they become receivable unless there is an obligation in substance to return the funds if conditions of the grant are not met. If there is such an obligation, the grants are initially recorded as grants received in advance and recognised as revenue when conditions of the grant are satisfied.

# Building and resource consent revenue

Fees and charges for building and resource consent services are recognised on a percentage completion basis with reference to the recoverable costs incurred at balance date.

#### Entrance fees

Entrance fees are fees charged to users of Council's local pools. Revenue from entrance fees is recognised upon entry to such facilities.

# Sales of goods

Revenue from the sale of goods is recognised when a product is sold to the customer. **Infringement fees and fines** 

Infringement fees and fines mostly relate to traffic and parking infringements and are recognised when the infringement notice is issued. The fair value of this revenue is determined based on the probability of collecting fines, which is estimated by considering the collection history of fines over the preceding 2-year period.

# Vested or donated physical assets

For assets received for no or nominal consideration, the asset is recognised at its fair value when Council obtains control of the asset. The fair value of the asset is recognised as revenue, unless there is a use or return condition attached to the asset.

The fair value of vested or donated assets is usually determined by reference to the cost of constructing the asset. For assets received from property developments, the fair value is based on construction price information provided by the property developer.

For long-lived assets that must be used for a specific use (e.g. land must be used as a recreation reserve), Council immediately recognises the fair value of the asset as revenue. A liability is recognised only if Council expects that it will need to return or pass the asset to another party.

# Donated and bequeathed financial assets

Donated and bequeathed financial assets are recognised as revenue unless there are substantive use or return conditions. A liability is recorded if there are substantive use or return conditions and the liability released to revenue as the conditions are met (e.g. as the funds are spent for the nominated purpose).

#### Interest and dividends

Interest revenue is recognised using the effective interest method. Interest revenue on an impaired financial asset is recognised using the original effective interest rate.

Dividends are recognised when the right to receive payment has been established. When dividends are declared from pre-acquisition surpluses, the dividend is deducted from the cost of the investment.

#### Construction contracts

Contract revenue and contract costs are recognised as revenue and expenses respectively by reference to the stage of completion of the contract at balance date. The stage of completion is measured by reference to the contract costs incurred up to the balance date as a percentage of total estimated costs for each contract.

Contract costs include all costs directly related to specific contracts, costs that are specifically chargeable to the customer under the terms of the contract and an allocation of overhead expenses incurred in connection with Council's construction activities in general.

An expected loss on construction contracts is recognised immediately as an expense in the statement of comprehensive revenue and expense.

Where the outcome of a contract cannot be reliably estimated, contract costs are recognised as an expense as incurred and where it is probable that the costs will be recovered, revenue is recognised to the extent of costs incurred.

Construction work in progress is stated at the aggregate of contract costs incurred to date plus recognised profits less recognised losses and progress billings. If there are contracts where progress billings exceed the aggregate costs incurred plus profits less losses, the net amounts are presented under other liabilities.

# **Borrowing costs**

Borrowing costs are recognised as an expense in the period in which they are incurred.

# **Grant expenditure**

Non-discretionary grants are those grants that are awarded if the grant application meets the specified criteria and are recognised as expenditure when an application that meets the specified criteria for the grant has been received.

Discretionary grants are those grants where Council has no obligation to award on receipt of the grant application and are recognised as expenditure when approved by Council and the approval has been communicated to the applicant. Council's grants awarded have no substantive conditions attached.

## Foreign currency transactions

Foreign currency transactions (including those for which forward foreign exchange contracts are held) are translated into NZ\$ (the functional currency) using the spot exchange rate at the date of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the surplus or deficit.

#### Income tax

Council does not pay income tax as Section CW39 of the Income Tax Act 2007 specifically exempts income derived by a local authority from income tax, unless that income is derived from a Council-Controlled Organisation, a port related commercial undertaking or as a trustee.

#### Leases

#### Finance leases

A finance lease is a lease that transfers to the lessee substantially all the risks and rewards incidental to ownership of an asset, whether or not title is eventually transferred.

At the commencement of the lease term, finance leases are recognised as assets and liabilities in the statement of financial position at the lower of the fair value of the leased item and the present value of the minimum lease payments.

The finance charge is charged to the surplus or deficit over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability.

The amount recognised as an asset is depreciated over its useful life. If there is no certainty as to whether Council will obtain ownership at the end of the lease term, the asset is fully depreciated over the shorter of the lease term and its useful life.

Council does not currently have any finance leases.

# Operating leases

An operating lease is a lease that does not transfer substantially all the risks and rewards incidental to ownership of an asset.

Lease payments under an operating lease are recognised as an expense on a straight-line basis over the lease term.

Lease incentives received are recognised in the surplus or deficit as a reduction of rental expense over the lease term.

#### Assets

#### Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts.

Bank overdrafts are shown within borrowings in current liabilities in the statement of financial position.

#### Receivables

Short-term receivables are recorded at the amount due, less an allowance for expected credit losses (ECL).

The Council and group apply the simplified ECL model of recognising lifetime ECL for receivables.

In measuring ECLs, receivables have been grouped into rates receivables, and other receivables, and assessed on a collective basis as they possess shared credit risk characteristics. They have then been grouped based on the days past due. A provision matrix is then established based on historical credit loss experience, adjusted for forward looking factors specific to the debtors and the economic environment.

Rates are "written-off":

- · when remitted in accordance with the Council's rates remission policy; and
- in accordance with the write-off criteria of sections 90A (where rates cannot be reasonably recovered) and 90B (in relation to Māori freehold land) of the Local Government (Rating) Act 2002.

Other receivables are written-off when there is no reasonable expectation of recovery.

# Derivative financial instruments and hedge accounting

Derivative financial instruments are used to manage exposure to foreign exchange arising from Western Bay Council's operational activities and interest rate risks arising from Council's financing activities. In accordance with its treasury policy, Council does not hold or issue derivative financial instruments for trading purposes.

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at each balance date.

The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and, if so, the nature of the item being hedged.

The Council and group have elected to not adopt the new hedge accounting requirements of PBE IPSAS 41 as permitted under the transitional provisions of PBE IPSAS 41.

## Significant Accounting Policies - Policies, Summaries and Statements

This means the Council and group continues to apply the hedge accounting requirements of PBE IPSAS 29 Financial Instruments: Recognition and Measurement.

The associated gains or losses on derivatives that are not hedge accounted are recognised in the surplus or deficit.

#### Other financial assets

Other financial assets (other than shares in subsidiaries) are initially recognised at fair value. They are then classified as, and subsequently measured under, the following categories:

- amortised cost:
- fair value through other comprehensive revenue and expense (FVTOCRE); or
- fair value through surplus and deficit (FVTSD).

Transaction costs are included in the carrying value of the financial asset at initial recognition, unless it has been designated at FVTSD, in which case it is recognised in surplus or deficit.

The classification of a financial asset depends on its cash flow characteristics and the Council and group's management model for managing them.

A financial asset is classified and subsequently measured at amortised cost if it gives rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal outstanding, and is held within a management model whose objective is to collect the contractual cash flows of the asset.

A financial asset is classified and subsequently measured at FVTOCRE if it gives rise to cash flows that are SPPI and held within a management model whose objective is achieved by both collecting contractual cash flows and selling financial assets.

Financial assets that do not meet the criteria to be measured at amortised cost or FVTOCRE are subsequently measured at FVTSD. However, the Council and group may elect at initial recognition to designate an equity investment not held for trading as subsequently measured at FVTOCRE.

Financial assets are classified into the following categories for the purpose of measurement:

- fair value through surplus or deficit
- · loans and receivables
- · held-to-maturity investments; and
- fair value through other comprehensive revenue and expense.

The classification of a financial asset depends on the purpose for which the instrument was acquired.

## Subsequent measurement of financial assets at amortised cost

Financial assets classified at amortised cost are subsequently measured at amortised cost using the effective interest method, less any expected credit losses. Where applicable, interest accrued is added to the investment balance. Instruments in this category include term deposits, community loans, and loans to subsidiaries and associates.

# Subsequent measurement of financial assets at FVTOCRE

Financial assets in this category that are debt instruments are subsequently measured at fair value with fair value gains and losses recognised in other comprehensive revenue and expense, except expected credit losses (ECL) and foreign exchange gains and losses are recognised in surplus or deficit. When sold, the cumulative gain or loss previously recognised in other comprehensive revenue and expense is reclassified to surplus and deficit. The Council and group do not hold any debt instruments in this category.

Financial assets in this category that are equity instruments designated as FVTOCRE are subsequently measured at fair value with fair value gains and losses recognised in other comprehensive revenue and expense. There is no assessment for impairment when fair value falls below the cost of the investment. When sold, the cumulative gain or loss previously recognised in other comprehensive revenue and expense is transferred to accumulated funds within equity. The Council and group designate into this category all equity investments that are not included in its investment fund portfolio, and if they are intended to be held for the medium to long-term.

## Subsequent measurement of financial assets at FVTSD

Financial assets in this category are subsequently measured at fair value with fair value gains and losses recognised in surplus or deficit.

Interest revenue and dividends recognised from these financial assets are separately presented within revenue.

Instruments in this category include the Council and group's investment fund portfolio (comprising of listed shares, bonds, and units in investment funds) and LGFA borrower notes.

## Expected credit loss allowance (ECL)

The Council and group recognise an allowance for ECLs for all debt instruments not classified as FVTSD. ECLs are the probability-weighted estimate of credit losses, measured at the present value of cash shortfalls, which is the difference between the cash flows due to Council and group in accordance with the contract and the cash flows it expects to receive. ECLs are discounted at the effective interest rate of the financial asset.

ECLs are recognised in two stages. ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). However, if there has been a significant increase in credit risk since initial recognition, the loss allowance is based on losses possible for the remaining life of the financial asset (Lifetime ECL).

When determining whether the credit risk of a financial asset has increased significantly since initial recognition, the Council and group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Council and group's historical experience and informed credit assessment and including forward-looking information.

The Council and group considers a financial asset to be in default when the financial asset is more than 90 days past due. The Council and group may determine a default occurs prior to this if internal or external information indicates the entity is unlikely to pay its credit obligations in full.

# Financial assets at fair value through surplus or deficit

Financial assets at fair value through surplus or deficit include financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short-term or it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of short-term profit-taking. Derivatives are also categorised as held for trading unless they are designated into a hedge accounting relationship for which hedge accounting is applied.

Financial assets acquired principally for the purpose of selling in the short-term or part of a portfolio classified as held for trading are classified as a current asset. The current/non-current classification of derivatives is explained in the derivatives accounting policy above.

After initial recognition, financial assets in this category are measured at their fair values with gains or losses on remeasurement recognised in the surplus or deficit.

#### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the balance date, which are included in non-current assets.

After initial recognition, they are measured at amortised cost, using the effective interest method, less impairment. Gains and losses when the asset is impaired or derecognised are recognised in the surplus or deficit.

#### Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities and there is the positive intention and ability to hold to maturity. They are included in current assets, except for maturities greater than 12 months after balance date, which are included in non-current assets.

After initial recognition they are measured at amortised cost, using the effective interest method, less impairment. Gains and losses when the asset is impaired or derecognised are recognised in the surplus or deficit.

#### Fair value

## Fair value through other comprehensive revenue and expense

Financial assets at fair value through other comprehensive revenue and expense are those that are designated into the category at initial recognition or are not classified in any of the other categories above. They are included in non-current assets unless management intends to dispose of, or realise, the investment within 12 months of balance date. Council includes in this category:

- investments that Council intends to hold long-term but which may be realised before maturity; and
- shareholdings that Council holds for strategic purposes.

On derecognition, the cumulative gain or loss previously recognised in other comprehensive revenue and expense is reclassified from equity to the surplus or deficit.

# Impairment of financial assets

Financial assets are assessed for evidence of impairment at each balance date. Impairment losses are recognised in the surplus or deficit.

## Loans and receivables, and held-to-maturity investments

Impairment is established when there is evidence that Council and group will not be able to collect amounts due according to the original terms of the receivable.

Significant financial difficulties of the debtor, probability that the debtor will enter into bankruptcy, receivership, or liquidation and default in payments are indicators that the asset is impaired.

The amount of the impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted using the original effective interest rate. For debtors and other receivables, the carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the surplus or deficit. When the receivable is uncollectible, it is written-off against the allowance account. Overdue receivables that have been renegotiated are reclassified as current (that is, not past due). Impairment in term deposits, local authority stock, government bonds, and community loans, are recognised directly against the instrument's carrying amount.

## Financial assets at fair value through other comprehensive revenue and expense

For equity investments, a significant or prolonged decline in the fair value of the investment below its cost is considered objective evidence of impairment.

## Significant Accounting Policies - Policies, Summaries and Statements

For debt investments, significant financial difficulties of the debtor, probability that the debtor will enter into bankruptcy, and default in payments are objective indicators that the asset is impaired.

If impairment evidence exists for investments at fair value through other comprehensive revenue and expense, the cumulative loss (measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in the surplus or deficit) recognised in other comprehensive revenue and expense is reclassified from equity to the surplus or deficit.

Equity instrument impairment losses recognised in the surplus or deficit are not reversed through the surplus or deficit.

If in a subsequent period the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognised, the impairment loss is reversed in the surplus or deficit.

#### Non-current assets held for sale

Non-current assets held for sale are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. Non-current assets held for sale are measured at the lower of their carrying amount and fair value less costs to sell.

Any impairment losses for write-downs of non-current assets held for sale are recognised in the surplus or deficit.

Any increases in fair value (less costs to sell) are recognised up to the level of any impairment losses that have been previously recognised.

Non-current assets (including those that are part of a disposal group) are not depreciated or amortised while they are classified as held for sale.

# Property, plant and equipment

Property, plant, and equipment consist of:

# Operational assets

These include land, buildings, landfill post-closure, library books, plant and equipment, and motor vehicles.

#### Restricted assets

Restricted assets are mainly parks and reserves owned by Council and group that provide a benefit or service to the community and cannot be disposed of because of legal or other restrictions.

#### Infrastructure assets

Infrastructure assets are the fixed utility systems owned by Council and group. Each asset class includes all items that are required for the network to function. For example, sewerage reticulation includes reticulation piping and sewerage pump stations. Land (operational and restricted) is measured at fair value, and buildings (operational and restricted), library books, and infrastructural assets are measured at fair value less accumulated depreciation. All other asset classes are measured at cost less accumulated depreciation and impairment losses.

#### Revaluation

Land and buildings (operational and restricted) library books, and infrastructural assets (with the exception of land under roads) are revalued with sufficient regularity to ensure that their carrying amount does not differ materially from fair value and at least every three years.

The carrying values of revalued assets are assessed annually to ensure that they do not differ materially from the assets' fair values. If there is a material difference, then the off-cycle asset classes are revalued.

Revaluations of property, plant, and equipment are accounted for on a class-of-asset basis. The net revaluation results are credited or debited to other comprehensive revenue and expense and are accumulated to an asset revaluation reserve in equity for that class-of-asset.

Where this would result in a debit balance in the asset revaluation reserve, this balance is not recognised in other comprehensive revenue and expense but is recognised in the surplus or deficit. Any subsequent increase on revaluation that reverses a previous decrease in value recognised in the surplus or deficit will be recognised first in the surplus or deficit up to the amount previously expensed, and then recognised in other comprehensive revenue and expense.

Transportation assets including roads, bridges and footpaths were revalued at depreciated replacement cost at 1 July 2018 and certified by Opus International Consultants Limited.

Water, wastewater and stormwater assets including reticulation, treatment plants, reservoirs and bores were revalued at depreciated replacement cost at 1 July 2017 and certified by Aecom New Zealand Limited.

Land and buildings, except land under roads, were revalued at fair value at 1 July 2017 by Opteon. Library books were revalued at fair value by Aecom at 1 July 2017 and Marine assets were revalued at fair value by Tonkin and Taylor at 1 July 2017.

All other asset classes are carried at depreciated historical cost.

#### **Additions**

The cost of an item of property, plant, and equipment is recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the item will flow to Council and the cost of the item can be measured reliably.

Work in progress is recognised at cost less impairment and is not depreciated.

In most instances, an item of property, plant, and equipment is initially recognised at its cost. Where an asset is acquired through a non-exchange transaction, it is recognised at its fair value as at the date of acquisition.

Costs incurred subsequent to initial acquisition are capitalised only when it is probable that future economic benefits or service potential associated with the item will flow to Council and group and the cost of the item can be measured reliably.

The costs of day-to-day servicing of property, plant, and equipment are recognised in the surplus or deficit as they are incurred.

## Disposals

Gains and losses on disposals are determined by comparing the disposal proceeds with the carrying amount of the asset. Gains and losses on disposals are reported net in the surplus or deficit. When revalued assets are sold, the amounts included in asset revaluation reserves in respect of those assets are transferred to accumulated funds.

#### Depreciation

Depreciation is provided on a straight-line basis on all buildings, bridges, reticulation assets and other structures, at rates that will write off the cost (or valuation) of the assets to their estimated residual values over their useful lives. Diminishing value is used for motor vehicles, office equipment and furnishings, library books and computer systems. Land and drains are non-depreciable. The useful lives and associated depreciation rates of major classes of assets have been estimated as noted overleaf.

Buildings		
• Concrete	100 years	Straight line
• Wooden	40 years	Straight line
• Improvements	10 years	Straight line
_and		Not depreciated
Other plant and equipment	10 years	Diminishing value
Office equipment and furnishings	10 years	Diminishing value
Computer systems	5 years	Diminishing value
Motor vehicles	5 years	Diminishing value
Library books	10-15 years	Straight line
nfrastructural assets		
Roading network		
• Pavements (base course)	25 to 75 years	Straight line
• Seal	5 to 60 years	Straight line
• Unsealed	3 to 5 years	Straight line
• Other	5 to 70 years	Straight line
<ul> <li>Formation (not depreciated)</li> </ul>		
Bridges		
• Concrete	100 years	Straight line
• Steel	50 years	Straight line
Reticulation		
• Water	20 to 60 years	Straight line
• Sewerage	60 to 100 years	Straight line
• Stormwater	80 to 120 years	Straight line
• Treatment plant and equipment	25 to 50 years	Straight line
Wooden reservoirs	80 years	Straight line
Concrete reservoirs	100 years	Straight line
• Dams	100 years	Straight line
• Bores	100 years	Straight line
Coastal Structures	22 years	Straight line

#### Significant Accounting Policies - Policies, Summaries and Statements

The residual value and useful life of an asset is reviewed, and adjusted if applicable, at each financial year end

# Impairment of property, plant, and equipment and intangible assets

Intangible assets subsequently measured at cost that have an indefinite useful life, or are not yet available for use are not subject to amortisation and are tested annually for impairment.

Property, plant, and equipment and intangible assets subsequently measured as costs. Impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and its value in use.

If an asset's carrying amount exceeds its recoverable amount, the asset is regarded as impaired and the carrying amount is written-down to the recoverable amount. The total impairment loss is recognised in the surplus or deficit. The reversal of an impairment loss is recognised in the surplus or deficit.

# Intangible assets

## Software acquisition and development

Acquired computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software.

Costs that are directly associated with the development of software for internal use are recognised as an intangible asset. Direct costs include the software development employee costs and an appropriate portion of relevant overheads.

Staff training costs are recognised in the surplus or deficit when incurred.

Costs associated with maintaining computer software are recognised as an expense when incurred.

Costs associated with development and maintenance of Council's website are recognised as an expense when incurred.

#### **Easements**

Easements are recognised at cost, being the costs directly attributable to bringing the asset to its intended use. Easements have an indefinite useful life and are not amortised, but are instead tested for impairment annually.

#### Carbon credits

Purchased carbon credits are recognised at cost on acquisition. Free carbon credits received from the Crown are recognised at fair value on receipt. They are not amortised, but are instead tested for impairment annually.

They are derecognised when they are used to satisfy carbon emission obligations.

#### **Amortisation**

The carrying value of an intangible asset with a finite life is amortised on a straight-line basis over its useful life. Amortisation begins when the asset is available for use and ceases at the date that the asset is derecognised. The amortisation charge for each period is recognised in the surplus or deficit.

The useful lives and associated amortisation rates of major classes of intangible assets have been estimated as follows:

Computer software	3 to 5 years	20% to 33.3%
Resource consents	life of the asset	5%
Property subdivision rights	19 years	5.3%

#### Forestry assets

Standing forestry assets are independently revalued annually at fair value less estimated costs to sell for one growth cycle. Fair value is determined based on the present value of expected future cash flows discounted at a current market determined rate. This calculation is based on existing sustainable felling plans and assessments regarding growth, timber prices, felling costs, and silvicultural costs and takes into consideration environmental, operational, and market restrictions.

Gains or losses arising on initial recognition of forestry assets at fair value less costs to sell and from a change in fair value less costs to sell are recognised in the surplus or deficit. Forestry maintenance costs are recognised in the surplus or deficit when incurred.

#### Investment property

Properties leased to third parties under operating leases are classified as investment property unless the property is held to meet service delivery objectives, rather than to earn rentals or for capital appreciation.

Investment property is measured initially at its cost, including transaction costs.

After initial recognition, all investment property is measured at fair value at each reporting date. Gains or losses arising from a change in the fair value of investment property are recognised in the surplus or deficit.

## **Payables**

Short-term payables are recorded at the amount payable.

#### **Borrowings**

Borrowings are initially recognised at their fair value plus transaction costs. After initial recognition, all borrowings are measured at amortised cost using the effective interest method. Borrowings are classified as current liabilities unless the Council or group has an unconditional right to defer settlement of the liability for at least 12 months after balance date.

## **Employee entitlements**

#### Short-term employee entitlements

Employee benefits expected to be settled within 12 months after the end of the period in which the employee renders the related service are measured based on accrued entitlements at current rates of pay. These include salaries and wages accrued up to balance date, annual leave earned to, but not yet taken at balance date, retirement gratuity and long-service leave expected to be settled within 12 months and sick leave. A liability for sick leave is recognised to the extent that absences in the coming year are expected to be greater than the sick leave entitlements earned in the coming year. The amount is calculated based on the unused sick leave entitlement that can be carried forward at balance date, to the extent it will be used by staff to cover those future absences.

A liability and an expense are recognised for bonuses where the Council has a contractual obligation or where there is a past practice that has created a constructive obligation.

#### Long-term employee entitlements

Employee benefits that are due to be settled beyond 12 months after the end of the period in which the employee renders the related service, such as long service leave and retirement gratuities, have been calculated on an actuarial basis. The calculations are based on:

- likely future entitlements accruing to staff, based on years of service, years to entitlement, the likelihood that staff will reach the point of entitlement, and contractual entitlement information; and
- the present value of the estimated future cash flows.

#### Presentation of employee entitlements

Sick leave, annual leave, and vested long service leave are classified as a current liability. Nonvested long service leave and retirement gratuities expected to be settled within 12 months of balance date are classified as a current liability. All other employee entitlements are classified as a non-current liability.

#### **Provisions**

A provision is recognised for future expenditure of uncertain amount or timing when there is a present obligation (either legal or constructive) as a result of a past event, it is probable that an outflow of future economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to the passage of time is recognised as an interest expense and is included in "finance costs".

#### Landfill post-closure provision

Council as operator of the Te Puke and Athenree landfills, has a legal obligation under the resource consent to provide ongoing maintenance and monitoring services at the landfill sites after closure. A provision for post-closure costs is recognised as a liability when the obligation for post-closure arises.

The provision is measured based on the present value of future cash flows expected to be incurred, taking into account future events including legal requirements and known improvements in technology. The provision includes all costs associated with landfills post-closure.

# Financial guarantee contracts

A financial guarantee contract is a contract that requires the Council to make specified payments to reimburse the holder of the contract for a loss it incurs because a specified debtor fails to make payment when due.

Financial guarantee contracts are initially recognised at fair value. If a financial guarantee contract was issued in a stand-alone arm's length transaction to an unrelated party, its fair value at inception is equal to the consideration received. When no consideration is received, the fair value of the liability is initially measured using a valuation technique, such as considering the credit enhancement arising from the guarantee or the probability that Council will be required to reimburse a holder for a loss incurred discounted to present value. If the fair value of a guarantee cannot be reliably determined, a liability is only recognised when it is probable there will be an outflow under the guarantee.

#### Significant Accounting Policies - Policies, Summaries and Statements

Financial guarantees are subsequently measured at the higher of:

- the present value of the estimated amount to settle the guarantee obligation if it is probable there will be an outflow to settle the guarantee, and
- the amount initially recognised less, when appropriate, cumulative amortisation as revenue.

# **Equity**

Equity is the community's interest in Council and is measured as the difference between total assets and total liabilities. Equity is disaggregated and classified into the following components.

- · Accumulated funds
- Restricted reserves
- · Property revaluation reserve
- · Fair value through other comprehensive revenue and expense reserve,
- · Council created reserves.

#### Restricted reserves

Restricted reserves are a component of equity generally representing a particular use to which various parts of equity have been assigned. Reserves may be legally restricted or created by the Council.

Restricted reserves include those subject to specific conditions accepted as binding by Council and which may not be revised by Council without reference to the Courts or a third party. Transfers from these reserves may be made only for certain specified purposes or when certain specified conditions are met.

Also included in restricted reserves are reserves restricted by Council decision. Council may alter them without reference to any third party or the Courts. Transfers to and from these reserves are at the discretion of Council.

# Property revaluation reserve

This reserve relates to the revaluation of property, plant, and equipment to fair value.

# Fair value through other comprehensive revenue and expense reserve

This reserve comprises the cumulative net change in the fair value of assets classified as fair value through other comprehensive revenue and expense.

#### Council created reserves

These reserves are made up general reserves and form a component of equity. They include Asset replacement reserves, disaster contingency reserves and general reserves.

## Goods and Service Tax (GST)

All items in the financial statements are stated exclusive of GST, except for receivables and payables, which are presented on a GST-inclusive basis. Where GST is not recoverable as input tax, it is recognised as part of the related asset or expense.

The net amount of GST recoverable from, or payable to, the IRD is included as part of receivables or payables in the statement of financial position.

The net GST paid to, or received from, the IRD, including the GST relating to investing and financing activities, is classified as an operating cash flow in the statement of cash flows.

Commitments and contingencies are disclosed exclusive of GST.

## **Budget figures**

The 2021 budget figures are those approved by Council in its 2020-21 annual plan which have subsequently been revised due to the shift in opening balances arising from the 2019-20 Annual Report. The budget figures have been prepared in accordance with NZ GAAP, using accounting policies that are consistent with those adopted by the Council in preparing these financial statements.

## **Cost allocation**

The cost of service for each significant activity of Council has been derived using the cost allocation system outlined below.

Direct costs are those costs directly attributable to a significant activity. Indirect costs are those costs that cannot be identified in an economically feasible manner with a specific significant activity.

Direct costs are charged directly to significant activities. Indirect costs are charged to significant activities using appropriate cost drivers such as actual usage, staff numbers, and floor area.

# Impact of COVID-19

Western Bay Council has assessed the impacts of COVID-19 on its position as at 18 February 2021, and its key accounting estimates and its assumptions looking forward.

Council considers that the impact of COVID-19 immaterial and subsequently there are no adjustments required to key accounting estimates and assumptions.
